German Teachers Must Pass Examination

Cable dispatches have revealed the serious state of affairs in the South Tyrol, from the Italian point of view, which culminated in the recent outburst by Benito Mussolini, the Italian Duce, and which caused considerable commotion in the press of the world. Little attention has hitherto been given to the Austrian side of the question, a comprehensive idea of which may gained from the accompanying

VIENNA, Feb. 13 (Special Correspondence)—Through its press Austria is recurrently presenting a peal. And all this is to let the people Austria is recurrently presenting a serious case against Italian treatment of Austrian minorities in South Tyrol. If the information published is even substantially correct, then the Italians are applying such oppressive measures as will one day plane the question, before the

bring the question before the League of Nations.

Italy was given by the peace treaties the province or territory known ies the province or territory known ies the province or territory known is the province or territory known in the smaller of the smaller brazilian towns. as South Tyrol, comprising the land towns where there are no daily immediately south of the famous Brenner Pass and inhabited by, roughly, 250,000 Austrians. This pass is the strategic gateway be-tween Italy and the north, which means between Italy and Germany in the long run, since Austria is of insignificant military importance. Italy's occupation of South Tyrol enabled it to obtain control of the Brenner Pass, and thus to place a strong barrier against any possible future Germanic invasion of Italy.

A Military Necessity Whether Italy required this protection is debatable, but, granting

A Band in the Family that possession of the Brenner Pass was a military necessity, this still cannot explain away the forcible means employed by the Fascist Italy to Italianize the Austrian popula-tion which have been admitted in the Italian Chamber of Deputies by the Minister of Education. The Austrians Minister of Education. The Austrians do with the cinema is Zimmermann, even to the brass band of ten pieces even to the brass band of ten pieces even to the brass band of the theater bedeclare the Italians guilty of deliberate measures destined in time to the brass band of ten pieces that plays in front of the theater beipe out all traces in the territory fore the show opens. of the Austrian language and, as far as possible, of Austrian associations. rise the bandsmen disband. Compulsory Military Training at Schools and Colleges Not Favored

Debating the question, "Should Military Training be Abolished From Our High Schools and Colleges? some 50 students from educational institutions in and around Boston gathered at the Y. W. C. A. building on Huntington Avenue, this morning took the position that war was an evil and should be abolished, that militarization of a country led to war and that compulsory military training, therefore, should not be

permitted. Abraham Wirin, secretary of the Fellowship of Youth for Peace, spoke against compulsory military training and the Rev. Howard Wilkinson, pastor of Emmanuel Church, West Roxbury, who is a captain in the Reserve Corps, United States Army, spoke in favor of it.

Mr. Wirin claimed that since 1916 there had been an enormous growth in military training in schools and colleges of the United States. During the year 1924-1925 more than 266 educational institutions in the United to circle the world in the record time States maintained units of the Re-serve Officers Training Corps to next June. Lieutenant Wells is now which had been assigned by the War Department 768 officers and 1064 enlisted men to carry on the training. The War Department was pressing similar training in all higher educa-

tional institutions Growth of Militarism

The growth of militarism in educational institutions Mr. Wirin thought was the most dangerous feature of militarism in the United States. While the United States Governmen had been very sympathetic toward world peace, on the one hand, on the other it was building up an extensive military program. The greater bulk of its revenues, he said, were used in defraying the expenses of war, past or prospective. He quoted General Pershing to the effect that he locked forward to the time when public opinion in the United States would be molded by men in the military training camps and said that General Pershing would like to have a R. O. T. C. in every high school and col-

Peace, said Mr. Wirin, in closing could best be secured through fair and honorable dealing and through justice of the cause rather than through strength of militarism. For one thing the Rev. Mr. Wil-

FROM CRITICS BY

Special from Monitor Bureau WASHINGTON, Feb. 27 — Two Democratic senators, Cole Blease from South Carolina, and William Cabell Bruce, from Maryland, by voting with Republicans, enabled the Administration to reject the report of the Walsh investigating commit tee, which censured the Department of Justice for alleged procrastination in proceeding against the Aluminum Company of America, in which Andrew W. Mellon, Secretary of the Treasury, and other members of his family have large holdings.

The report written by Thomas J. Walsh (D.), Senator from Montana, after several weeks of inquiry into the affairs of the Attorney-General's department, has been approved by a majority of the members of the Senate Judiciary Committee, which conducted the inquiry.

The Senate did not ballot on the report as originally submitted by Mr. Walsh. The author at the last moment moved that the last paragraph of the findings, which recom-mended additional inquiry into the activities of the Attorney-General's department, be stricken out. This severe arraignment of the Attorney-General.

is not expected that the Attorney-General will be conversant with the details of all litigation before his department, and he may well be entirely ignorant of some matters having or calling for its attention, but it is not too much to expect that he will at least be informed concerning a charge by his predecessor and another branch of the Government in effect that a fellow member of the Cabinet, at least a corporation of which he is the dominant factor, has been guilty of contemptuous dis-

regard of an injunction of a federal

The outcome of the vote was un-certain until the last name had been called. Owing to the large number TWO DEMOCRATS of absentees there was much pair ing of votes. The final count was 36 to 33. Both Messrs. Blease and Bruce, who were in the chamber when their names were called for Senators Blease and Bruce the first time, "passed" the vote and did not answer until the clerk, as is the rule, repeated the names of those who had not voted. They then announced their votes with the Republicans. Had they voted with their party colleagues the outcome would have been 35 to 34 for the report.

Seven Republicans, Progressive and Insurgents supported the 26 crats who voted for the report. These Republicans were: William E. Borah, Idaho; Smith W. Brookhart, Iowa: James Couzens, Michigan: Lynn Frazier, North Dakota; Robert B. Howell, Nebraska; Robert M. La Follette, Wisconsin; Gefald P. Nye, North Dakota.

While deflection to the Republicans on the part of Senators Blease and Bruce was directly responsible for the rejection of the report, the absence of W. H. McMaster (R.), Progressive, Senator from South Dakota; John B. Kendrick (D.), Senator from Wyoming, and Henrik Shipstead (F. L.), Senator from Minnesota, who were not paired, was also a factor. There was no explanation from any of these as to their absence. It was announced as is the custom that they were "unavoidably detained." George W. Nor-ris (R.), Senator from Nebraska, was also absent but he was paired.

Puts End to Further Action The disapproval of the report put an end to further action on the matthis mitigation, the report was a ter. Joseph T. Robinson, (D.), Senator from Arkansas, Democratic floor leader, had succeeded in get-ting Mr. Walsh to agree to his offering a resolution which would have authorized the President to appoint special counsel to proceed against

the Aluminum Company. This was to substitute for an investigation by a Senate committee as desired originally by Mr. Walsh. Mr. Robinson announced that

should the Walsh report be approved by the Senate he would immediately offer his resolution. The rejection of the findings, which was a great disappointment to the Democrats and Progressives, closed the matter. Mr. Robinson did not offer his resolution and Mr. Walsh after adjournment expressed doubt as to the desirability of pressing the matter. Burton K. Wheeler (D.), Senator

from Montana, and Robert H. La Follette (R.). Senator from Wisconsin, however, declared that the issue should be carried through to the final step. The closeness of the vote may result in an effort being made to put through the Robinson resolution.

An acrimonious debate preceded the vote. It was a triangular argument. Mr. Walsh aggressively defending his report and its findings and David A. Reed (R.), Senator from Pennsylvania, and Albert B. Cummins (R.). Senator from Iowa, who wrote a brief dissenting report, questioning and denying.

In one exchange Mr. Reed observed in objection to further investigation. it is going to run down every possibility of corporate affiliation.

"I think," was the reply, "that if we followed Mr. Mellon into all of his lairs and affairs, we would be very busy."

Mr. Blease "Getting Back" planation of his adverse vote. Other dure which frequently falls short of Democratic senators stated, however, that he declared he was "getting back" at his party for support ing the World Court, which he bit-

do not intend to play partisan poli-tics and politics was involved in this report. It is a serious thing when the Senate censures a member of the Cabinet and then proposes to rub it in and take the proceeding away from him and turn it over to

another agency.

"Possibly there may have been some delay in the Department of Justice, but I do not think it sufficient to justify such a censure of the Attorney-General as proposed by the report."

COUNCIL CANDIDATES' DRAWING ANNOUNCED

Candidates for councilman in Ward 6, South Boston, were drawn by Melancthon Burlen, chairman of the Melanction Burlen, chairman of the election commission, today as follows: No. 1, Patrick M. Sheehy; No. 2, Daniel Carroll; No. 3, Michael J. Mahoney; No. 4, Leo J. Halloran; No. 5, Patrick E. Carr; No. 6, Dr. Joseph C. Seymour. Special elections will be held in Ward 6 on March 9. Registration will be held March 1 and 2

Finding that Massachusetts courts this requirement is an indictment of are lax, but not corrupt, and making the manner in which the system of several recommendations for their improvement, Jay R. Benton, attorno additional legislation is necessary ney-general, last night made public to remedy the situation as it appar-the results of an investigation by 85 ently exists in Suffolk County at the leading attorneys of more than 400 present time. There is now ample cases in which it was alleged by Frank A. Goodwin, registrar of Motor Vehicles, and Herbert A. Wilson, Boston police commissioner, that the ends of justice had been defeated.

The chief opportunity to improve Massachusetts are striving ably and court administration is seen by the attorney-general to be in a stricter responsibilities. It is for us to exenforcement of ball laws to lessen press continued confidence in them. defaults of those admitted. There have been many errors of judgment the priceless heritage that has been on the part of former assistants in ours since the foundation of the Comthe office of Thomas C. O'Brien, Suf-folk County prosecutor, Mr. Benton says, and what he calls an amazing lack of co-operation between the courts, the prosecutors and officials charged with the duties of probation and parole-

The chief criticism which Mr. Goodwin and the police commissioner volved the application of undue political influence to prevent convic-tion in the courts. Regarding this point, little is specifically said in the report and no disclosures of a sensational nature are made.

Goodwin Charges Investigated Opening the report, the Attorney General refers to the "grave" charges made by Mr. Goodwin, and he explains that his department selected 86 of the most important cases, submitted them to a group of veteran lawyers, and studied the re-

sulting reports.
One of the chief difficulties in Suffolk County, it is explained, lies in the congestion of the courts, and the great burden which is thrown upon the district attorney's office. None of his assistants have time enough to consider all cases adequately, Mr. says, and he adds significantly "hindsight is better than fore-

Considering the problems arising out of the admission of defendants to bail, the Attorney-General becomes more severe, and says:

"By far the greater percentage of the cases investigated involved issues and problems arising out of and inants to bail. These cases indicate a certain laxness or looseness in the admission of defendants to bail in Suffolk County, a lack of co-operation between the various authorities having records of defendants, laxity in promptly securing default war-rants, failure energetically to prosecute suits against sureties after default, settlement of cases against sureties for nominal amounts even though the defendants have not been apprehended prior to the settlement, and an amazing willingness to remove defaults without committing defendant and without increasing bail, even though such defendant has been defaulted in the same case

time and time again. Power to Handle Problem "The object of bail manifestly is to nsure the presence of the defendant Mr. Blease would make no ex- in court when required. Any proce-

and for improved procedure.

Knowledge of Record Necessary "It seems clear to me that courts cannot properly dispose of cases unless they know the whole record of the defendants before them.

"I, therefore, recommend legislation requiring probation officers to obtain from the commission whatever records are available relative to defendants before the disposition of their cases. I further recommend that the General Court consider the advisability of legislation requiring each court to obtain from the probation commission, through the bation officer attached to it, the record of each defendant appearing be fore it before disposing of his case. In conclusion, the Attorney-General indorses the recommendations Mr. Benton says: "The courts of of the Massachusetts Judicial Council, and renews his own recommendations made in an annual report some weeks ago. In general, these advocate that justice be made more speedy, and that certain court pro-cedures be simplified.

go free on personal recognizance after he had been convicted of lar-ceny, and this is particularly so when court, the past record of the defend-ant shall be submitted to the presidt was well known in the district attorney's office that he was a perdition of the persons offering them-selves as sureties shall be investiistent criminal.

Defaulted Bail Cases "Perhaps it is 'poor judgment' for

the district attorney's office to settle defaulted bail cases for nominal sums with one of Mr. O'Brien's campaign managers who was a professional hondsman, and it certainly will be 'poor judgment' if nothing further is done to this professional bondsman than was done a few days ago by Judge Fosdick, who according to newspaper reports, revoked the right of this bondsman to do any more business. It is strange that it was not until I gave the facts in this case to Mr. Benton that the superior court judge and the district attorney's office took action.

"The fact that Mr. Benton has made no reference to political influence in the courts and office of the districtattorney is explained, no doubt, by the statement made by a Boston rep-

resentative a short time ago, who said that all you have to do is stand in the court corridors and you will see not only Democratic, but Republican politicians helping out their friends, and the way they help them out is to get their cases placed on real strettes be deart with more out is to get their cases placed on file, on probation, suspended sentences, nol prosses and then if by any chance their friends get into jail, they use their good offices to get them out through parole."

involved the probation system, and BANK TAXATION HEARING DATE SET

Public hearing before the special state commission to study bank taxation appointed by Gov. John G. Winant under authority of the 1925 Legislature, was called today for the Senate Chamber, State House here on April 2. If necessary the hearing will be continued on April 3. The commission includes Prof. James P. Richardson, Hanover, chairman: Ernest P. Roberts, Concord, secretary; Edward B. Stearns, Manchester, George M. Putnam, Hopkinton and Eaton D. Sargent,

tive, and that is what the Italians

"It is not lack of liberty," he said, "that sends the Italian workman with just complaints to Mussolini. The Italian population, millions and millions of law-abiding, they may be allowed to work undisonged continuance. The speech of turbed by professional agitators; ount Cippico at Williamstown last they ask for a full dinner pail, not of government.

"Mussolini is not a menace to the world. Harsh decisions have been taken because half-measures had failed to accomplish results. He has used force, whenever persuasion has not sufficed, but this exercise of force has been warranted by extraorin the sun. Under parliamentary dinary circumstances, and has, in all events, been displayed for the welfare and with the sanction of the

ountry."
Professor Elliott presented a com brehensive study of the origin and development of the Fascist ment in Italy, and he severely criti-"Certainly there is no reasonable gers which inhere in despotic rule.

Answer in the Future "The world has seen the shadows

of imperialistic despotism lengthen before now," he concluded. "Is this shadow apt to become also a subof guild-socialism upon the interesting model suggested by the recent "Order has been re-established, a reforms of the Italian Senate to repguilds of employers and employees it may well become constitutional

"In that case, Italy's imperialism that it now is. But if the theatrical character of Mussolini is the only cement that is to bind the movement, its life need not give us any vexation, even if its proposals do. For al peace is more and more apparent its feudalistic elements will rend the imperial mantle of Mussolini, whenever his firm grip slackens or

is altogether relaxed.
"He is a great and in some ways a tragic figure, as the arch-prophet of dictatorship, Lenine, was before him. He works with a devotion that none can question, although one may be permitted still in this country to doubt the ultimate wisdom of his methods. "What will be the aftermath that

must come eventually? We are told that Fascism will renew itself as

Bolshevism has done. By the regimentation of Italian education, further, we are told that the nature of Italy being changed to accept discipline But the human nature of the autocrats who are to do the disciplining has not changed since long before Alexander's generals disrupted the

remnants of his empire. There is no machinery in Fascism newer than the usual inner circle of an oligarchy. And oligarchy has ple of Government in a country as far advanced in civilization as modern Italy. It may serve in Eussia. Can it serve, without danger to its own country and to the world, in occidental Europe?"

STUDENTS TAKE ANTI-WAR STAND

individual and because human nature had not yet risen to a point when it could be trusted not to go cized what he characterized as its to war upon its neighbors. He would imperialistic leanings and the dan-make military training compulsory because youth did not always know what was good for it and because the habit of obedience should be inculcated.

To illustrate, he said, he could sometimes do better in the preparation of a sermon on Saturday morning, with the specter of Sunday morning before him and a crowd of people who had to be given something they/wanted, than he could do on Monday or Tuesday.

Opposed to War as Such

Mr. Wilkinson declared himself as opposed to war as such, but with human nature as it is he thought it necessary for a nation to be prepared for war. Military training taught citizenship, he said, and quoted the parable of the seven virgins to prove that with nations as with virgins the injunction is to "be prepared." When all men are ready to beat their swords into plowshares and love their neighbors as themselves, there would be no need for war but until then it was his belief do when war should come.

ADDED SPENDING TAX LAW DEFICIT

Saving to Nation Will Increase Prosperity

WASHINGTON, Feb. 27 (A)-Provisions of the new tax reduction bill are now in operation, with President Coolidge holding the belief that the measure will cause a Treasuryy deficit of \$100,000,000 at the end of the next fiscal year.

Further reductions may be possible within a few years as the public debt is lowered, but in the mean-time Mr. Coolidge hopes Congress will go slowly in approving measpriations. He has particularly in mind the proposals for increasing by about 10 per cent. the expeditures in behalf of the Army and Navy.

may be removed if Congress is careful of the Government's finances, Mr. ditional revenue for the Treasury if duction of religious instruction in the tax reduction effects increased schools under their control. the tax reduction effects increased prosperity throughout the country.

Change in Provisions

MCADOO READY TO BLOCK SMITH

1928 Compromise, Says Former Manager, Ohio Governor or Iowa Man

NEW YORK, Feb. 27 (AP)-If the next Democratic convention is deadlocked in its choice between William G. McAdoo and Alfred E. Smith, Governor of New York, the presidential omination will go either to J. Victor Donahey, Governor of Ohio, or to Edward T. Meredith of Iowa, Judge David L. Rockwell of Cleveland, who was campaign manager for Mr. McAdoo in 1924 declared here.

Judge Rockwell said that Mr. Mc-Adoo, while not now a candidate, has lost none of his strength which deadlocked the Madison Square Garden convention. He intimated that Mr McAdoo was prepared to avow his candidacy as soon as Governor Smith entered the grace. If the nomination fell to neither

of those leaders, as in the last bitter convention, Judge Rockwell was certain that either Governor Donahey or Mr. Meredith would have the support of all the West and middle West. Mr. Donahey, he said, was on a par with Mr. Smith as a vote-getter, and has the support of both the Labor and Farm votes. Mr. Meredith, who was Secretar; of Agriculture under President Wil

knowledge of the agriculture problem would make him an especially strong candidate. He also said that in case Presi

son, has never run for office bu

H. F. SPENDER CHANGES POST By Cable from Monitor Bureau

LONDON, Feb. 27-Under the caption, "Mr. H. F. Spender," the West minster Gazette today prints the following: "We regret that the Westminster Gazette will, in a few weeks. lose the services of Hugh F. Spender as diplomatic correspondent, by his OSLO, Norway, Feb. 27—At a Cabinet met met ing yesterday a bill was brought forwayd for a referendum on the present liquor prohibition on Oct. 17 and 28. The referendum would be the terms of a bill passed by the consumers of gasoline are paying a tax of 5 cents a gallon under the terms of a bill passed by the consumers of gasoline are paying a tax of 5 cents a gallon under the terms of a bill passed by the consumers of gasoline are paying a tax of 5 cents a gallon under the terms of a bill passed by the consumers of gasoline are paying a tax of 5 cents a gallon under the terms of a bill passed by the consumers of gasoline are paying a tax of 5 cents a gallon under the terms of a bill passed by the consumers of gasoline are paying a tax of 5 cents a gallon under the terms of a bill passed by the consumers of gasoline are paying a tax of 5 cents a gallon under the terms of a bill passed by the consumers of gasoline are paying the paying the term of the present liquor prohibition on Oct. 17 and 28. The referendum would be paying the paying the

and gifted services to the West-minster Gazette, first as parliamentary correspondent and more recently as diplomatic correspondent for 30 years, and his colleagues will greatly miss him. Mr. Spender has also written much on foreign affairs in monthly reviews, and is author, sometimes in collaboration with his wife, of several novels with a political background. He is one of the three joint editors of the new en-cyclopædic year book, 'Europe.'"

What Chey are Jaying.

DR. J. L. MILLER: "The civilization that exists only for itself and its own selfish extrava-gances will inevitably rust out."

AGNES BOYSEN: "A man may be familiar with the location of countries and their capitals, but f he doesn't help to establish friendly relations with people—beginning with his own neighbors—if he does not help to establish laws that will benefit all retions and not margin one little nations and not merely one little group of people, his geography has not been of benefit to numanity."

BERKELEY MOYNIHAM:. "Statistics can prove anything-even the truth."

J. R. GORDON: "The American people have forgotten how to be ship-minded, consequently they are indifferent to what befalls their national shipping."

E. H. HIBBARD: "Many millions of acres should as speedily as possible be put back into forest, for while corn is distressingly cheap, lumber is correspondingly

ARCHBISHOP OF YORK: "It is not through the material but rather through the spiritual that the world of nature is to be understood.'

WILLIAM LYON PHELPS: "It is better to be a good husband, father, brother, son, friend, than to be a successful professional machine." HOUSE ACTION ENDS AMICABLY

L. J. Maxse Accepts Offer to Insert Correcting Footnote in Volume of Letters

By Cable from Monitor Bureau LONDON, Feb. 27-The action to prevent the publication of Colonel House's letters brought by L. J. Maxse, editor of the National Review, has been settled amicably by the publishers agreeing to insert a footnote in the book, making it clear that no reflection was made on Mr. Maxse's honor in the passage to which the latter took objection. Mr. Maxse has also agreed to bring no action against Colonel House in respect of this matter.

Colonel House had written about a luncheon with Lord Northcliffe on May 5, 1915, at which he said Mr. Maxse was the only other guest. "Neither Lord Northcliffe nor Mr. Maxse thought there was a big man connected with either the Government or the army. He told of the number of men they had in France at this time and the number in every place," adding: "It was most indiscreet to tell these facts, if in-

deed they are facts."

The publishers have now declared that the word "he" did not refer to Mr. Maxse, and that the whole passage did not reflect in any way on his honor. Mr. Maxse's counsel stated Mr. Maxse wished "to make it perfectly clear that as far as he was concerned, the whole account of the conversation was a base fabrication, that no such conversation took place to which he was a party, and that he would not have countenanced anything of that character."

LABOR HEAD UPHOLDS PLEA FOR HIGH WAGES

PRINCETON, N. J., Feb: 27 (AP) High wages were advocated by William Green, president of the American Federation of Labor, in an address to economics students of Princeton.

"Profits earned," said Mr. Green, "do not go into the channels of business so quickly as wages. High purchasing power maintained among working people is a stimulating force to industry."

THE CHECK CONTRACTOR C

er Appeals Give Middlesex Tribunal a Holiday

Middlesex County Superior Criminal Court was forced to suspend because the end of the docket had been reached and there were no other cases ready for trial. This is the first time this has happened in the history of the court, according to Arthur K. Reading, dis-

Mr. Reading told Judge George A. Flynn, that with the exception of a few misdemeanor cases and the indictments against Lowell city offitrial, the docket has been exhausted. Mr. Reading said that one reason for the clean docket is that there are fewer appeals coming up from the district courts because the su-perior court has been sustaining lower court judgments with almost

unbroken regularity. Finding that there is no hope of special consideration from higher courts, the defendants have decided that appeals are a waste of time and money and, with few exceptions, have taken the judgment of the district court as final.

Mr. Reading also pointed out that all court officials have been "on their toes" in an effort to get the docket cleared and expedite court

Spring Flower Show to Stress Amateur Gardener's Importance

Believed That Upon People Who Plant and Tend Their Own Plots Depends Interest of Public in Horticulture

The forthcoming spring flower tural Society and one of the largest show of the Massachusetts Horticultural Society is to be held for five Among the members of the society

deners and the members of the garden clubs upon whom public interest in flowers must depend. In proportion will the whole business of flower growing be stimulated throughout in ol ed in the many free the country, because the beginner is inevitably willing and glad to borrow a leaf from the book of the experienced growers and to establish contacts with him which seek to borrow education from him, in return for which they will divert to him

patronage for his own products.

Thus a considerable emphasis in tury old, have conditions been so favorable for a display of flowers, bulbs, plants and plant life as a condition of the conditions been so favorable for a display of flowers, bulbs, plants and plant life as conditions of the conditions of the condition of the conditions of the con took place in them.

8. The whole Austrian territory the choicest specimens to contribute

ministration and Mrs. Franklin, Boston University dean of women, concluded a tour of eastern colleges yesterday with a lecture at Boston University on the recently discovered letters of Sydney Lanier.

Such are, briefly, the main critical and conservatories have for weeks been grooming the beautiful burdens of their houses in order that the public might have opportunity to see, as it has not hitherto seen, what is being done for the progress what is being done for the progress of horticulture by individual noncommercial growers as well as by

prizes ranging from \$1000, which is the grand prize for the best bouquet of cut roses. In addition to the cash prizes there will be offered a score

days beginning Wednesday, March 17 who are enthusiastically backing the to March 21 inclusive.

It will bear out the conviction ter of the / nold Arboretum; Albert constantly gaining wider circulation C. Burrage of Manchester, and Mrs. mong flower growers in the United Homer C. Gage of Shrewstury, who States, that it is the amateur gar- will have a bulb garden in the building.

An innovation this year will be in flowers must depend. In proportion as more people, especially when the establishment of an admission fee. To Mark the Opening of a New Service for Smaller Women-A Style Exposition of New Spring Models to introduce

Petite Madame Dresses

Five to 5 feet 4 inches in height

Not a new department, but a NEW service added as a regular feature of our Women's Dress Salon.

Petite Madame Frocks are designed specifically for the smaller woman who has heretofore had difficulty in securing the styles she wanted, without extensive alterations.

Petite Madame Frocks serve two types of figures-the little woman, too small to be fitted in regular 36 to 46 sizes, yet not small enough for the sylph-like things young girls wear-and the young woman who has frequently had to buy things that were too old and in certain respects too large for her.

The In rtance of Lines 1s Stressed

After all, a dress is not more fashionable than the lines on which it is designed. Petite Madame Frocks are carefully designed along authentic lines, and feature only what is correct for the SMALLER WOMAN to wear.

We are ready now with a charming group of Petite Madame Frocks for smaller women, in styles for street or afternoon. Prices are very

This, he said, can be achieved in the main by making the hotels so attractive on minor operations in the factory such as patent leather repairing and that business men and the touring public, generally, will like to come NEW POLICE BUILDING

Emile F. Coulson of the Westminster Hotel, president of the as-sociation, declared in opening the meeting that essential to the solu-tion of the hotel men's problems was membership in the association, with all members working unitedly for hotel betterment.

If the major problems confronting them are to be solved, it is more imended by Mayor Nichols for the portant for hotel men to co-operate completion of the new police head- now than ever before, Frederic S. Snyder, former president of the Bos Streets, the Finance Committee of ton Chamber of Commerce, told the the Boston City Council will make members. The best way to accom plish results was to appoint committees who would work intensively on given points, he said. New England is going ahead commercially, he said, and it was the business of the

hotel men to assist it.

Other speakers were Theodore
Jones of the International Stewards'
Association; W. W. Davis, chairman of the association's legislative com mittee; Charles Brown, president of the Cape Cod Hotel Association; Frank C. Hall of the Hotel Somerset president of the New England Hotel Association.

The day's program concluded at the Hotel Somerset with a banquet and masked ball arranged by Louis P La Franche of the Victoria, Arthur Race of the Copley-Plaza and L. H. Torrey of the Hemenway. By an unusual arrangement, the women were served a beautifully appointed dinner at one end of the hall, while the men were served in Bowery style at the other. Checkered table cloths lent grandeur to the occasion, but the bill of fare, scrawled on a blackboard overhead, included "Klam stoo, 15c" and "Fried oisters, 5c each." The waiters at this end of the room were attired as French Apaches.

Missouri Town Without Crime, Courts, Taxes or Government

Charles L. Delbridge of St. Louis Owns Town in Ozarks Government Urged to Assist in Which He Rents Homes to Law-Abiding People

St. Louis Special Correspondence IGHTY-FIVE miles up in the of one year without court or crime. Science Monitor, Mr. Delbridge said: The place is small but growing, and it stands for an idea. It is the practical development of a thought long held by Charles L. Delbridge, a St. Louis publisher of mathematical books, who contends that we have too many laws, courts and lawyers that have been the product of what he calls collective ownership or the modern city. He stands for the very

Somewhat more than a year ago Mr. Delbridge took steps to put his theory into practice. An account of what he has done is the best method of explaining his idea. Looking about for a location, he found 2000 acres of woodland several miles removed from a railroad in Washing-ton County. It is reached by a main highway and a short new road that goes directly into the property. In the approximate center of the land he laid out a village of conventional plan, with streets at right angles. He built a large storehouse which he filled with staple merchandise and announced to the curious farmers who watched the proceedings that someone would operate the store on cash basis and a Golden Rule neory. He told anyone who inquired as to his project that he would build houses and shops for any resident or artisan, to be taken over for a reasonable rental, but that no land He announced then and at intervals thereafter that he and his associates would operate the village on a cost basis with a fundamental understanding that the sole qualification of residents would be an observance of the simple elemental rules of right and wrong and that violators would automatically void their right to remain in the village and participate in its activities.

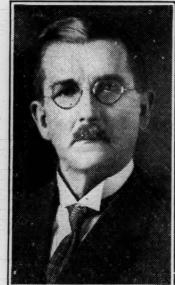

to the town of Delbridge. The ernment expense, including courts and litigation, has made it possible for the promoters of the idea to keep their costs down as planned. The store has grown. Mr. Del-bridge says that it is already the

largest general store in Washington County and that with an addition now in prospect it will have main counters over a city block in length. He says that the store has customers from 30 miles in each direction. "The business is run without profit," says Mr. Delbridge, "and it will be con-tinued on that basis."

Eliminating Cost of Crime As an auditor and as author of a standard set of books on mathematics, with especial relation to accountancy. Mr. Delbridge has had of public schools in Washington having to do with government. It has watched the enterprise from its was from this experience that he inception, even to the extent of visitcame upon the thought that crime ing the project while the initial has always been costly, not only to the erring individual and to society, but to the state itself as a mere matter of operation. He has long

Unratified Amendments

Child labor amendment, June, 1924, ratified by three states, Arizona, California and Wisconsin, and re-

jected by 21. Constitution which would empower Illinois.

Titles of nobility amendment, prohibiting any citizen of the United States accepting any foreign title

Apportionment of representatives, proposing a ratio of representatives to population, September 1789, ratifled by 10 states.

Notwithstanding scores of proposed amendments and the submission of two none were approved by the states between the years of 1804 and 1864. Then came a period during which three amendments were sent to the states and ratified. In five years, 1365-1870, the thirteenth, fourteenth and fifteenth amend-

ments were approved.

Forty years of immobility in this phase of rational legislation fol-lowed. From 1909 until 1924, the and nineteenth amendments were cting or non-ratifying states.

In fact, in 1873 when the tide of submitted and ratified and the twen-

nts that had been pending since coach line from Boston to Halifax 9. This amendment prohibited for the coming summer. As there is creases that Congress might now an excellent highway from the

MINES NEEDING NATIVE LABOR

Industry in Obtaining Cheaper Help

DURBAN, S. Af., Jan. 18 (Special Correspondence)-At a recent meeting of the Chamber of Mines in Johannesburg, the president gave an important address on the seriousness of the labor question, as affecting the working of the gold mines in South Africa. He informed the chamber that the industry was being seriously hampered through the great short-age of native labor, which means that the revenue of the country is af-

The president stated that the mines require about 180,000 natives and nearly 20,000 Europeans for skilled work and supervision to carry or the work of the mines efficiently whereas during the past month the total natives employed numbered only 167,000, which means a heavy reduction in European employment and a decreased output, while the country suffers by the reduction in working expenditure at the rate of £100,000 per month.

Government Unsympathetic

The president seemed to imply in his address that the Governmen are not sympathetic enough toward the industry and are inclined to advocate a white labor policy to meet the wishes of the Labor Party members of the Cabinet. He said in part:
"The Government should not use

the occasion of our adversity in the shape of a shortage of labor to ram down our throats a 'white labor policy' which we are convinced is economically unsound so far as our rental for living and business accom-modations. The other 75 per cent has been saved because there has been we are just as anxious as anyone to see South Africa filled with a its punishment. Think of that—75 large and prosperous white comper cent for housing expense saved in a year's experiment. We have had no taxes that have not been met by that they do not practice what they the income that is represented by preach (with their own money pate in its activities.

So far—and the theory has been in operation about one year—there has been no court action in or in relation to the town of Delbridge. The in a sphere where failure would be less disastrous to the country than in the mining industry. If the experiment is a success, the industry will not be slow to adopt the policy."

Working Costs

To prove his statements that such a policy would not be economical the president gave some working costs on the presumption that white labor was introduced for native labor. of these people as our guests in Del- eight Europeans would do the work

The average cost of the European would be about 10s. per diem, roughly three times the cost of a more than a native laborer, and, as the whole industry requires about 180,000 natives and 20,000 Europeans to work the mines efficiently, the added cost to the industry, if European labor were employed instead of native labor, would be over £18,-000,000 per annum, which is about 50 per cent greater than the working

Effects of Policy

Also since the mines are owned by effect of such a policy on individual thought of selling land rights in his town. He merely gives — with em
name up in the mountains.

the late office abandoned the theory controlling the little community that is growing up with his mines would, survive. These 11 mines could employ 51,000 unskilled white laborers, but at what a cost to the industry and the country. The tonnage milled would decrease from 28,000,000 to 9,000,000, the grade of ore would be 81/2 dwt. instead of about £17,000,000, the business of the country diminishing in proporamount to about £4,000,000 per annum instead of £13,000,000, and the expenditure in wages would deabout £13,000,000 to about £8,000,-

> Having placed all these figures before the chamber, the president in Boston during made an eloquent appeal to the Government to allow the industry
>
> The League deep conting the route of the the route to secure all the native labor that it requires, first from within the borders of the Union, and if this is Corwin amendment, proposing the prevention of any addition to the to assist the industry to obtain the necessary native labor elsewhere.

GREAT LAKES LEVELS TO BE INVESTIGATED

MONTREAL, Feb. 17 (Special Correspondence)-A solution of the problem of restoring and maintain-ing the water levels of the Great or honor without the consent of Congress, May 1810, ratified by 12 Lakes and the St. Lawrence, will be Compensation of members of Congress, September 1789, ratified by the Montreal Board of Trade. Attributed to the Chicago diversion, the water levels in the lakes and St. Lawrence waterways have fallen in recent years. It is estimated that ocean ships using Montreal have ocean ships using Montreal have been obliged to reduce their loading full quota of \$370,800 will be contribdraft to an extent that involves a

loss of \$8,000,000 annually. Colonel Starke proposes to call a conference of representatives of all general convention last October. Canadian organizations interested in store the water levels.

Gray for Spring

ARLIER it was whispered that gray would be popular for spring wear. Now the whisper has swelled to a shout—and it is very popular! Not only gray, in its varied shadings of opal, zephyr, Thistledown, stormcloud—but the little mist of gray that has crept into the new tints of rose, blue, green, lending them an irresistible softness. Here you'll find frocks, wraps, slippers, hats, hose in gray and its accompanying group of dusty pastel colors.

Loveman, Joseph & Loeb

BIRMINGHAM, ALABAMA

Met Sponse in the hall this morning—She was as slick and shiny as could be— "Ah ha," I said, "you've had a bath!"

The Diary of Snubs, Our Dog

"Yes, and that's just what you're going to get," she replied. But I told her I had been given a good scrubbing only last week and that I thought it would be several days before I needed another one"

Just the same I didn't feel any too comfortable when suddenly the Boss began to call me —

And I soon discovered that Sponse was absolutely right! I did my best to convince the Boss I didn't need a bath but he wouldn't listen to me-"Hey," he said, I'm giving a big party this afternoon and I want you to look nice!"

Of course I felt differently about it then, only I don't understand why he couldn't have had his party last week when I was nice and clean!

Progress in the Churches

in Russia, the Russian Baptist Union has obtained data of 3028 churches belonging to that body. News is connative, so that on the basis of 312 tinually being received concerning shifts per annum, a European churches and groups newly formed, laborer would cost £104 per annum not belonging to the union.

Some of these churches are in remote parts of Siberia or in the Archangel Government. The total number of Baptist churches is esti-mated at about 4000, which are spread throughout the whole of Russian territory, from the Baltic as far as Japan, from the Arctic to Turkey, Persia, and China.

A 4. 4 Before long the American churches will be making wide use of descant in Urbana III next October singing at their services. Prof. Walter ready used widely in England.

. + + + The Rev. Vincent Vacek of Daruvar writes that there is a bright future before the churches in Jugoslavia. The Baptist communities are small, but they have full liberty to worship and preach. The number of members increases; the difficulty is to provide churches for them. 4 4 4

director of the diplomatic weekly, L'Europe Nouvelle, has returned from the United States. Usually the opinions of travelers on countries which they have been to c countries which they have seen superficially are not of great importance, but there was one phrase in the description that Louise Weiss gave to me of her American tour which is truly striking. "I am," she said, "a French Liberal—that is to say, I try to be progressively minded; but I also love my country. Now I discovered that in the United States there is in many quarters a strong anti-French feel—

ing that he should have been temporarily disgusted with parliamentary indicates that the country is awake to the importance of efficient education brought into line with present-day needs.

Mr. Barraclough, president-elect of the National Union of Teachers, said at the Leeds conference that he heard of "commercial men wanting managing clerks of 14 years old at 5s. a week and writing to the press if they could not obtain them in battalions." Such determined efforts to quarters a strong anti-French feeling. Unfortunately the anti-French feeling is greatest in progressive ment is falling in France is highly circles. In conservative circles there persists a sentimental regard for France. Therefore, to appeal to conservative circles I was tempted to servative circles I was tempted to the confusion. When the Chambar ideas, and to appeal to the confusion. When the Chambar ideas, and to appeal to the confusion when the Chambar ideas, and to appeal to the confusion when the Chambar ideas, and to appeal to the confusion when the Chambar ideas, and to appeal to the confusion when the Chambar ideas, and to appeal to the confusion when the Chambar ideas, and to appeal to considerably. At servative circles I was tempted to the contusion. When the Chamber sacrifice my liberal ideas; and to appeal to progressive circles it was almost necessary to join in a condemnation of my country. There was rarely full accord between myself and any section of America. Either we differed on general political conceptions. When the Chamber is a considerably and ber showed that it contained no majority for a positive financial plan and merely contained a destructive and Eighteen," and in the center of England's manufacturing districts the past. He maneuvered skillfully. differed on general political conceptions, or we differed with regard to France." The statement is not, of course, entirely correct. There are many well-wishers of France in progressive circles just as there are conservatives who are somewhat hostile toward France. But perhaps there is sufficient truth in the contention of Mademoiselle Weiss to set us think-Mademoiselle Weiss to set us think- nance Commission which is domiing. Naturally one sees a foreign nated by the cartellists. His idea country through the window of one's temperament. There are those who condemn France because of M. Poincaré. There are others who would like France to be composed of M. Poincarés, because they admire the methods of the former President.

There are Francophiles who would it: now it only remains for you to There are Francophiles who would support a militarist France and there are Francophobes who, in spite of France's unquestionable efforts to calculations, would be amenable to ward the nacification of Furone pacification of Europe, never thank France for any concession it makes in the interests of peace but, on the contrary, blame it still more severely because the concessions are considered to be insufficlent. Every country must necessa-

rily be contradictory. The Moroccan Misadventure

With regard to the Moroccan misadventure the attitude of the French Government is not found altogether pleasing. Last July M. Painlevé was ready to state the French terms, openly recognized Abd-el-Krim, and admitted the justice of some kind of independence for the Riff. Today the Government is not willing to negotiate with Abd-el-Krim, whose authority it questions. The truth is that the French and the Spanish have made such formidable efforts since last winder to overcome the Riff. With regard to the Moroccan mislast summer to overcome the Riff that they would feel humiliated if their tremendous army overcome the Round Officiel the list of the last that they would feel humiliated if their tremendous army, equipped with the nost modern material, did not utterly smash the "rebels." It is a strange situation. On the one side are a few thousand Riffians who are not well supplied with arms and one to the deputies were so involved in demagogy that they were afraid to you are a few thousand Riffians who are not well supplied with arms and one to the deputies were so involved in demagogy that they were afraid to not well supplied with arms, and on the other side are troops numbering hundreds of thousands with immense quantities of munitions. Moreover, the little army did not strenuously oppose the big army. Yet the big army makes small progress. Surely there is something wrong even from Codification of Law the military point of view. The fact is that the French commanders have not understood the necessity of adjusting their instruments to the special conditions. Marshal Pétain and the numerous generals who assist him have apparently seen no differ-ence between warfare with Germany warfare with the Riff. Their overwhelming forces are a positive disadvantage. They cannot move ith-out the most labored and complicated clans. They inflict far more damage on the French taxpayer than on the Riffians. A French military critic has likened the struggle between France and the Riff to a struggle between a ponderous hammer and a nimble fly. All these great cannons and tanks are difficult to move, and when they move the "enemy" has vanished. Whatever importance Abd-el-Krim may have in himself he has reason to feel flattered by the tremendous concentration against him. He has also reason to be thankful that the ambition of the military men has so

DALLAS-ATLANTA AIR LINE PLANNEI

Passenger Service to Link With Tampa-Miami Route

DALLAS, Tex., Feb. 12 (Special Correspondence)—Closely following the arrival of the first airplane for the Chicago-Dallas airplane mail service comes the announcement that plans have been completed for the establishment of daily air freight and passenger service between this city and Atlanta via Birmingham and signatures, and the "rubricas" or Little Rock.

Ford all-metal planes will be used on this route, which will be operated by the Florida Airways Corporation. This corporation has started service between Tampa and Miami and in less than two months expects to ex-tend the schedule to Atlanta, after which Dallas will be included on the

YOU ARE ENTITLED! TO KNOW THE FACTS!

20,000,000 motor vehicles now travel the American highways.

50,000,000 Americans ride in these cars every day in the year.

Safety for this vast army of travelers is a national issue, and where safety is involved plain speaking is a public duty.

It is high time the public realized - as experts have long realized—that automobile bodies should be made of steel-not of wood or any other fragile material.

Indeed, it is one of the mysteries of this usually progressive industry that the all steel body is not already in universal use.

It will be before long. Public opinion will demand it—as it now demands that railway sleeping cars be all steel.

For even a child knows that steel is stronger than wood-that steel will not splinter or burn-and that all steel bodies will stand up under impacts that would crush ordinary bodies to bits.

That is why Dodge Brothers pioneered in introducing the all steel body - pioneered again recently, in improving and perfecting it - pioneer, now, in urging its adoption by every automobile builder in the world.

The issue is plain—

Manufacturers must build safely if the automobile industry is to hold its present high place in public usefulness and esteem.

And the all steel body - as exemplified in Dodge Brothers Motor Car-is the greatest single advance in motoring safety made in the last fifteen years.

The car will continue to be a "four." No reasoning buyer will be distracted from the issue of QUALITY by mere CYLINDER propaganda.

CALIFORNIA IS AN EASY WINNER

Defeats Oregon in Opening Pacific Coast Conference Championship Series

PACIFIC COAST CONFERENCE BASKETBALL

OAKLAND, Calif., Feb. 27 (Special) —Coach C. M. Price's University of California basketball team outplayed the University of Oregon in the Oakland Auditorium last night, 32 to 17, and in so doing won the first game of the series which will determine the Decision Coact Conference charming. eific Coast Conference champion

The two teams will meet again tonight, and if California is again victorious, the title will go with the game.
If Oregon wins a third game will be
necessary to decide the championship.
A victory for California, which looms
as highly probable as a result of last
night's performance will give the Blue
and Gold their third consecutive Pacific Coast title.

and Gold their third consecutive ra-cific Coast title.

More than 5000 persons filled the auditorium by the time the starting whistle blew, and in spite of marked California supremacy throughout, were kept in a state of excitement from start to finish.

coach Price's charges started the game with a rush, taking the lead from the first, when W. D. Higgins '26, made a good free throw after a foul by J. C. Gunther '26. They kept it through to the final gun.

Neither the Oregon offense nor de Tense seemed capable of solving the cast play of the Blue and Gold. By fast passing and brilliant shooting, California was able to take a total of 79 hots at the basket, of which 15 took ffect. Oregon, on the other hand, was able to take only 35 tries in all, of which only four took effect. The impenetrable defense of Coach

Price's men was shown in the first the floor. All of these were long ones.

V. L. Carver '26, California guard, was the individual star and high-point man of the game with a total of seven field goals to his credit. His floor work as well as his shooting was brillian. Gunther led the Oregon scoring with one field goal and three successful free

The close guarding and hard man-to-man play was evidenced by a total of 24 personal fouls, of which 16 were called on California and eight on Oregon. W. D., Higgins '26, center, who has been the individual star for California all season, was forced out on personal fouls 10 minutes after the game started. He was followed only a few minutes later by R. C. Okerberg '27, Oregon center, and star, also a victim of fouls. The close guarding and hard man-to-

victim of fouls.

Oregon was handicapped considerably by the absence of S. W. Westergren '26, guard, from the lineup. Westergren, considered by many as one of the best guards on the Coast, was kept home in Eugene. The California team was at its full strength.

OTTO REISELT MEETS J. M. LAYTON NEXT

This Series Adds Interest Because of Latter's Advance

Player City W L HR BG PC Otto Reiselt, Phila. 82 46 14 29 .641 J. M. Layton, Mil'kee 84 58 12 30 .592 A. H. Kleckhefer, Chi. 76 60 15 28 .559 G. L. Copulos, Det. 61 69 15 35 .469 A. K. Hall, Chicago 55 91 13 30 .377 P. E. Maupome, Clev. 46 80 12 30 .365

Special from Monitor Bureau CHICAGO, Feb. 27-Can the league leader stop the advance of J. M. Lay-ton of Milwaukee, former champion, in the title race of the National Championship Three - Cushion Billiard League? This question, to be answered

the first three days of next week by Otto Reiselt of Philadelphia on his home table, has aroused new interest in the race. Layton made the first change in league standing in many weeks when he displaced A. H. Kieckhefer of this city for second place the other day.

he displaced A. H. Kieckhefer of this city for second place the other day. The Milwaukee contender now has won two more games than Reiselt, 84, though he has 12 more losses. If he continues his present pace, he may make up this difference.

According to one of his recent opponents, Layton has finally hit his stride after indifferent form all season. The former champion, it is said, is not only playing good billiards, but s not only playing good billiards, but the balls are rolling his way. This is a combination hard to beat and it means trouble for Reiselt at Philadel-phia, Monday, Tuesday and Wednes-day, as well as for P. E. Maupome at

day, as well as for P. E. Maupome at Cleveland the last three days.

A. K. Hall of Chicago, who has been slipping rapidly in recent games due to poor condition, continues on the road next week, visiting Copulos at Detroit the first three days and Kieckhefer's room here the last three.

REDS ON WAY TO GROUNDS
CINCINNATI, O., Feb. 27 (#)—Manager J. C. Hendricks and less than 12
players of the Cincinnati National
League Baseball Club made up the
squad that left here today for the Reds'
training grounds at Orlando, Fla. Other
members of the team will meet the Cincinnati contingent at Tinker Field to
begin practice Monday morning. E. J.
Riksey, R. B. Bressler, and P. J. Donohue,
regulars who falled to return signed
contracts, did not accompany the Hendricks squad. Nothing has been heard
from Riksey or Bressler. Donohue was
offered an increase over his last year's
salary, but is holding out for more.
President A. G. Herrmann said he expected Donohue to accept the club's
offer and report at Orlando Sunday or
Monday. REDS ON WAY TO GROUNDS

CANADA EMERGES VICTOR PINEHURST. N. C., Feb. 27—Canada nerged victorious against the United ates in the finals of the senior golf mnament here yesterday, when J. J. eller, kell-known left-hander of Ham-on, Ont., defeated C. S. Strout of deford, Me., at the twentieth hole, out was 1 up at the turn.

WORKMAN AT AMES AMES, Ia., Feb. 27 (P)—C. N. Work-nan, former Ohio State University foot-all star, and for three years athletic irector at Simpson College, Indianola, a., has been appointed head football bach at Iowa State College here, suc-seding S. S. Williams, new freshman bach at Ohio State.

St. Paul Climbs to Fourth in Standing

Defeats Winnipeg by Score of 9-2-Soo Wins Second Straight Game CENTRAL HOCKEY LEAGUE

ST. PAUL, Minn., Feb. 27 (Special)

The St. Paul Hockey Club made a
scoring record for Western amateur
nockey here last night when it de-

winnipeg goal and beating the defense.

At half time California led 18 to 6, and five minutes before the end of the game was, leading 32 to 10. At this point a number of substitutions were made with the result that the defense slackened and Oregon scored seven points bringing the score to its final count. ndividual dash two minutes before the end of the session. St. Paul is now in fourth place and faces a good chance of being in the playoff. The summary:

WINNIPEG ST. PAUL

ST. PAUL WINNIPEG
Naismith, A. Conroy, lw
rw, Woodall, O'Meara
Clark, Rice, c......c, Somers, Hughes
Garrett, Acaster, rw
lw, McMunn, Murdoch
Goheen, Nichols, 1d......rd, Borland
G. Conroy, Wilkle, rd....ld, Wasnie
Miller, g.....g, Gardiner
Score—St. Paul Hockey Club 9, Winnipeg Hockey Club 2. Goals—Goheen 2,
Garrett 2, Naismith, Acaster, A. Conroy, Rice, Clark for St. Paul: Murdoch,
Borland for Winnipeg. Referee—A. B.
Cooke, Calgary. Time—Three 20m.

James J. Donnelly, Greyhound defenseman, who won the previous night's game for the Soo by scoring the lone goal, was responsible for last night's win. Combining with Roy Lessard in the final minute of play, he took a pass at the goal mouth and beat Patrick Byrne on a shot that was to the standard. The summary:

In winning the 150-yard backstroke in 1m. 41 2.5s., he cut 3.5s. off the previous mark held by John Weiss-muller, Chicago.

He had no competition in the 150-yard freestyle, which he swam in 1m. 25 1.5s., 1 1.5s. faster than the record held by Weissmuller,

HARVARD FRESHMEN DEFEAT YALE SEXTET

A better trained and conditione hockey team of Harvard University freshmen easily defeated Yale University freshmen by a score of 10 to 4 at the Boston Arena last night as part of a doubleheader in which Cambridge High and Latin School defeated Stoneham High School 1 to 0 in over-

time.
The Crimson skaters clearly showed The Crimson skaters clearly showed superiority in every department of play and from the opening bell maintained the advantage. Yale showed lack of practice and was unable to offer adequate defense to the crushing Crimson offense led by John Tudor and A. S. Bigelow 2d, and H. G. Crosby.

HARVARD

B. U. DEFEATS DARTMOUTH The Boston University rifle team scored another victory and kept its standing in the New England Intercollegiate League when it defeated Dartmouth College 1928 to 1872. The Terriers are shooting a match with University of Cincinnati, and will compete with the marksmen of Massachusetts Institute of Technology and University of Nebraska next week,

MICHIGAN CUTS ILLINOIS' LEAD

Indiana and Purdue Win in the "Big Ten" Conference Basketball Race

CHAMPAIGN, Ill., Feb. 27 (Special)

—The University of Michigan basketball team took the measure of the University of Illinois combination here
last night in an Intercollegiate Conference struggle which ended in the
visitor's favor 33 to 24. The loss of the
game cut the lead of Illini in the "Big
Ten" Conference race to 1½ games.
Illinois now has three games to play
and if it is to get a clear title to the
championship it is necessary to win all
of them.

scoring record for Western amateur lilinois now has three games to play and if it is to get a clear title to the feated the Winnipeg sextet in a Central Hockey League game, 9 to 2.

At no stage of the game did the Maroons appear even to threaten and for the most part the game was a succession of St. Paul rushes, individual two and three-man affairs that broke up the Winnipeg defense and put to rout the great little goalie of the visitors, Charles Gardiner, who had one of the worst nights of his career.

Leading the relentless St. Paul attack was Capt. Frank Goheen, who played one of the best games ever seen on Hippodrome ice. Goheen was a leader in every attack and his body and hook-checking stopped many a Winnipeg rush. At times the Maroons passed Joseph Miller in the local nets; but for the most part their shots were from far out and it was largely a matter of a St. Paul forward or Goheen taking the puck down toward the Winnipeg goal and beating the defense.

The locals scored three times in the The locals scored three times in the Score—University of Michigan 33, University of Michigan 34, Chambers 3, Clinn for Meinigan 1 to the lead further than the lilinois now has three games to play and if it is to get a clear title to the championship it is necessary to win all of them.

The Wolverines jumped into the lead further than the latter to fix the hamfonship it is necessary to win all of them.

The Wolverines jumped into the lead further than the latter of the matter of a St. Paul attack and his body and broke up the Winnipeg was a winding of D. R. Ginn '26 and E. A. Harrigan '27 the provided down to one field goal. Substitutes the lillinois coring in this period down to one field goal. Substitutes were inserted in the Illinois lineup and a rally which fell short in the closing minutes of play caused the 7000 fans to keep up a continuous shout. Illinois trailed 19 to 29 with 10 minutes to play and put to rout the great little goalie of the was a part the same and the control of the man and the control of the h

MINNEAPOLIS. Minn. Feb (Special)—The University of Minne-sota basketball team lost its first home game of the season last night to Indiana University, 41 to 23. The Gophers playing without Herbert M. Wolden '26, center, and with Capt. Raymond F. Rasey '26 out of the lineup for the major portion of the game. for the major portion of the gam presented a weak opposition to the fast breaking Hoosiers in comparison with their showing against University of Michigan and University of Chicago. Score—St. Paul Hockey Club 9, Winnipeg Hockey Club 2, Goals—Goheen 2, Garrett 2, Naismith, Acaster, A. Conroy, Rice, Clark for St. Paul; Murdoch, Borland for Winnipeg. Referee—A. B. Cooke, Calgary. Time—Three 20m. SAULT STE MARIE, Ont., Feb. 27 (Special)—Sault Ste Marie Greyhounds redeemed themselves in the eyes of thousands of local fans here last night by making a clean sweep of the two-game series against Eveleth-Hibbing Rangers winning last night 2 to 1 in the last minute of a brilliant 10-minute overtime period.

James J. Donnelly, Greyhound determined the series and University of Chicago. Indiana was away to a five-point lead early in the game and the Hoosiers on the wings of good floor work on the part of Kenneth Beckner '27 and Frank Krueger '26 swept down the floor, making most of their shots good. It was not until Eldon W. Mason '27 swung into action with his pivot that Minnesota threatened, but it could not keep consistency in its play and the score at the end of the first half was 24 to 13 for the visitors. In the second period Coach Everett Dean of Indiana rushed many substitutes into the game, but they kept the speedy tempo of the play without

Patrick Byrne on a shot that was impossible to save.

Ade Johnson opened the scoring for the visitors 15 minutes after the first period started shooting a long high drive at J. P. Walsh which hit his shoulder and bounded into the net. Garnet Campbell, center player for the Greyhounds, tied the score 11 minutes after the second period started on a nice combination play with Roy Lessard.

The third period was productive of fast but rough hockey and no score was made. Both in the third period and in the 10-minute overtime period both teams resorted to love.

MISS BROWNE AND MISS KLOTZ MEET

women's South Atlantic golf cham-plonship tournament here, as the re-sult of one of the biggest upsets that

VICTO has occurred in women's golf circles

this year.
Miss Klotz furnished this upset yes-Miss Klotz furnished this upset yesterday when she defeated Miss Glenna Collett of Providence in the senifinal round, 3 and 2. This result was due to two things—Miss Collett was playing only an average game of golf, while Miss Klotz was playing a brilliant game. The latter drove brilliantly and her putting was of an equally high order. The Chicago champion led at the end of the first nine holes by 2 up. Miss Collett reduced this to 1 up by winning the eleventh; but when Miss Collett rimmed the cup on a six-foot putt at the twelfth the cup on a six-foot putt at the twelfth for a half, she was never able to catch up. Miss Klotz had a card of 40 for the first nine as against 43 for Miss

Montana Has a Unique Course

Grassless Golf Links Carved From a Mountain Side Hard to Play

HELENA, Mont., Feb. 26 (P)—The turfless golf course of the Helena Country Club is evidence that grass is not essential to a golf links. This pleasant 18-hole course is without a blade of green on tee, fairway or putting "green."

the only tinge of green to the course. Great rocks, some as large as houses, punctuate the "rough" between the descending and ascending fairways. They resemble a graded roadway and in fact are "moved" with a grading machine to keep them smooth.

The putting "greens" are circles of oiled sand, and each player perfects the surface of these areas himself, using a scraper having a piece of high piled carpet on its edge as a "lawn"

piled carpet on its edge as a "lawn mower" to make the greased silicon-level between his ball and the cup. The scenery about the club is mag-nificent. Grand vistas across valleys to far away ranges of peaks that cleave the sky make the course seem small, athough it is really large and more than 6200 yards long, occupying the whole side of a foothill.

Toppling over the entire club ground is a rocky spur, crested with pines. A great valley leads back to the Montana capital, passing hot springs that fur-nish all the warm showers and plunges

the golfer may want.

The one disadvantage of this grassless course is the dust that rises as players walk over it. But the dust is clean, washed for ages under the rains and snows that have crumbled the masses of granite to friable fragments. Some of the great boulders that have withstood this assault of nature are used as tees that rise above the fair-

used as tees that rise above the fairways like embattled towers.

The course is difficult, but may be scored in par by a good player. The surprising part is the holding power of the fairways. At first sight, members of the Golfers' Magazine expedition who played the links decided they could "drive a mile" down the descending fairways, but J. M. Barnes, Jock Hutchison, Charles Evans Jr. and other experts in the party found that the ball rolled only about as far as it did on Eastern sod. There seems to be a softness to the pulverized granite that oftness to the pulverized granite that takes off the speed as does grass.

VICTORIA, B. C., Feb. 27 (Special)

Victoria practically assured itself of a place in the annual playoff series of the Western Hockey League when it defeated Portland here last night by the decisive score of 4 to 1. The championship of the Western league thus

Foyston of Victoria, veteran of many Foyston of Victoria, veteran of many championships with the old Seattle Metropolitans, was the hero of last night's game. He put the Cougars in the lead before half a minute of play had elapsed in the first period when he took a pass from Walker in front of the Portland net, outwitted McCusker, and scored with ease.

TILDEN MEETS BOROTRA AGAIN

Keen Competition Looked For-Americans Need Only One Singles Match

NEW YORK, Feb. 27—Only one of the two singles matches scheduled for the two singles matches scheduled for this afternoon is needed by the Amer-ican team to win the international match with France, which is now be-ing played on the new central court of the Seventh Regiment Armory. Today's play will be a repetition of two of the fourth-round matches which furnished so much keen com-petition in the national indoor cham-nionships last week. Vincent Richpionships last week. Vincent Richards will meet J. R. Lacoste, the winner of the title, in the first match this afternoon, while the second match will bring W. T. Tilden 2d, against his conqueror of last week, Jean Borotra. The Americans took the lead in

the series yesterday, when the former national doubles champions of the United States, W. T. Tilden 2d, and Vincent Richards, united once more to defeat Lacoste and Jacques Brugto defeat Lacoste and Jacques Brug-non, the doubles selections of France. It was a hard battle all the way, with Frenchmen leading up to the final set. The complete score was 4-6, 6-2, 8-10, 6-1, 7-5. Only by the greatest display of their old time combination net play were the Americans able to offset the attack of the French team. Tilden was the main star and eam. Tilden was the main star an Richards, except for the occasional weakness of his service, which was really responsible for the loss of the first and thirds sets, displayed the volleys that have made him number two in the national ranking.

Frenchmen Win First The first set was really won in the first game. Tilden had service, and except for one perfect shot, lost four points when he allowed his returns to get within reach of the drives of Brugget within reach of the drives of Brugnon, who scored two placements and
forced errors by the champion for the
other two points. Then service won to
4—2, when Richards showed his first
service failure by dropping his game
on the volleys of the Frenchmen, and
though a struggle by the Americans
gave them the next, the set went to
the Frenchmen on their net play.

Lack on control by Brugnon at the
net in his overhead volleys was responsible for the loss of the second set
by the visitors. It enabled the Americans to take the fourth game off the
service of Lacoste, and with this advantage to their credit, Tilden and
Richards held the advantage to 5—2,
when Lacoste threw away his service

when Lacoste threw away his service game by careless play.

But the third set was the hardest of the match. Richards was decidedly off in control of his first service, and

though the partners managed to save the games until the score was 6-all, the next game went to the Frenchmen. But once more Brugnon developed a streak of inaccuracy overhead, and with Tilden towering at the net with all his vigor, the score was tied once more. But when the turn of Richards to serve came around once more, again the Frenchmen broke through, and this time the errors of Richards gave the set away, when a series of lobs which the former champions were us-ing to keep the visitors away from the went over the back line for outs. Tilden and Richards Rally

Lacoste managed to take the second ame of the next set on his service but the play of the Americans was now at its peak, and with the French-men losing their control in the face of the all court play of Tilden, and the volleys of Richards, as well as his matchless defensive returns of the smashes of Lacoste from close to the backstop, the Americans ran five games in succession for the set.

The winner of the final set was doubtful all the way Service won to

· IMPORTANT LEAGUE GAMES ON TONIGHT

As the Knickerbocker hockey team of New York, second in the Eastern Hockey Association standing, is idle tonight, Boston A. A., third in the

Hockey Association standing, is actionized tonight, Hoston A. A., third in the standing, has an opportunity to close in on the New Yorkers by defeating the New York A. C. at the Boston Arena tonight. Pere Marquette, league leaders by one point, have opportunity to increase the margin in its game with St. Nicholas.

The contests promise to be well worth watching since the St. Nicks are always a hard team for the Pere Marquette skaters, and the New York A. C. and B. A. A. already have many stirring games on record.

Since both Pere Marquette and the Knickerhockers have only two more games left on the league schedule each team is anxious regarding each game and victories at this time are essential to maintaining the lead. B. A. A. must win all its remaining games while the leaders lose to finish at the top.

DRAKE UPSETS WASHINGTON

Missouri and Oklahoma A. and M. Also Win in M. V. Basketball

DES MOINES, Ia., Feb. 27 (Special) -A revival of the form with which they opened the basketball season by defeating two Missouri Valley Conference opponents marked the comeback of the Drake University quintet here last night when they overwhelmed

last night when they overwhelmed Washington University with an avalanche of field goals and free throws, winning by a score of 40 to 22.

The game was the first of the year to be played on the Drake gymnasium floor. The crowd, packed tightly in every available nook and corner, cheered loudly as the Bulldog sophomore star, Irving W. Myers '28, put the ball through the loop seven times from the floor and four times from the foul mark. He was the first to score following the opening gun with a free following the opening gun with a free

to 21. Missouri gained a big lead in the first half, which ended 20 to 8 in favor of the Southerners, the Iowa quintet scoring one point less than Missouri in the last half.

J. M. McDonough '27 of the Tiger quintet was the high point scorer of the game, caging six field goals for this team. His running mate, L. G. Buckner '26, at left guard, played a fast game, covering the floor in stellar fashion and proving a big factor in this team's victory.

France Challenges for the Davis Cup

By the Associated Press New York, Feb. 27 WHILE its team is battling for international indoor honors, France "tossed its hat into the ring" yesterday for the 1926 Davis Cup competition. Formal notice of the challenge to apply to the European zone, was received by the United States Lawn Tennis Association in a letter from the gen eral secretary of the French Tennis

Association. France's stars, Jean Borotra and J. R. Lacoste, reached the challenge round against the United States last year, losing all five matches after a stirring battle. On the basis of their improved show ing so far this year, critics expect the wearers of the tri-color to be even stronger as well as the outstanding menace to this country's supremacy.

LITERARY NEWS REVIEWS AND BOOK

The American Constitution

The Usages of the American Constitu-tion, by Herbert W. Horwill. New York: Oxford University Press, American Branch. \$3.50.

N RECENT years there has been a notable awakening of interest in the Constitution, resulting in the publication of many volumes tem of checks and balances, and of pretation. None of these works has attempted an exhaustive study of the antecedents. The popular impression, uraged by the attitude of hero worship, is that some supermen as-ingly, Mr. Breckenridge traces the sembled and created something en-trend toward union, beginning in tirely new and untested out of their 1700 when, for different reasons, an explanation have sought the vored something of the sort. Thus genesis of the Constitution in Eurolitical experiments of the colonies. It is not a reflection on the constructive genius of the constitutional fathers to say that their ingenuity was not so much in creation as in selection, combination, adaptation.

"The Genesis of the Constitu-Breckenridge Long, former Assistant Secretary of State, has made a painstaking study of virtually all the colonial compacts, constitu-tions, and governmental forms, beginning with the Mayflower Cove-nant, and has found colonial precedents for most of the contrivances of net the Constitution. More: he has PHI HIS latest volume of verse by shown that democracy came over in the Mayflower; and, persistently manifesting itself in the political forms of the colonies, developed constantly in strength.

very important fact in his long and artistically happy career. He has re-The Mayflower Covenant The author's analysis of the Mayflower Covenant foreshadows the to decline in significance to the level ideas and ideals that came to be of the "Poets' Corner" in a local ideas and ideals that came to be "American." "The Pilgrims' constitution," he says, "implanted in America the principle of equality of men and 'due submission and obedience' to 'all just and equall lawes' which they themselves should frame. And it was on these principles, varied here and there but never changed, that all later agreements for governments for governments and believed the results of gold and here but never changed that all later agreements for governments for governments are cannot cannot be made the post been avoided had the poet been the most conventional many way and outcome of this experiments for gold and here but never changed, casks of canary can the royally-and cannot cannot be remainder of Dr. Bridges' experimenting in "Neo-to-laureates. Spenser, Daniel, and Ben Jonson, dutfully celebrated the remainder of Dr. Bridges' experimenting in "Neo-to-laureates. Spenser, Daniel, and Ben Jonson, dutfully celebrated the reigning sovereign's birthday by any way an outcome of this experiments in the skill exercised for the remainder of Dr. Bridges' experimenting in "Neo-to-laureates." The faults of a well-nigh perfect book are not in a local weekly newspaper. Seldom since the sixteenth century, when the first post of the remainder of Dr. Brid that all later agreements for gov-ernment were drawn in America. ernment were drawn in America.

And it was on the principle of submission to laws which they themselves should frame that the war for conventional notions of the themes lependence was declared and by which he ought to exalt his lyre,

ought and won."

The passion for home rule? Mr. such undeviating pursuit of the perfect technique. fought and won.' Breckenridge finds it first in the action of the Massachusetts Bay Colony in disregarding the clear in- laurel of his calling. If a laureate's tent of its charter and transferring main duty is to voice contemporary the operation of the board of con- aspirations, he fulfills it well, though trol from England to America by its in another sense than that of singing own vote. The rule of representative a tribute to martial valor or princely government? He traces this to the virtues, or the good intentions of the action of Massachusetts in 1634 when the freemen of each town met, and, on their own volition, selected their Ten years later, when these representatives began to meet apart from the members of the council, the two legislative chambers were fore-shadowed, and this plan, as the shadowed, and this plan, as the author shows, was generally followed in the subsequent plans of the colonists.

Instruct plant, as the hibits what in a preface is explained hibits what in a preface is explained humble personages as a schoolboy lying one night abed with full heart and pleasant thoughts making music;

The Fundamental Orders

Mr. Breckrenridge finds in the Fundamental Orders of Connecticut, 1639, the first "truly political constitution in America," which "contained the seeds of the Federal Contained the seeds of the Federal stitution in America," which "con-tained the seeds of the Federal Con-

Even before this, as he shows, there was a movement looking to a confederation of the New England colonies for mutual protection against the Indians and the Dutch in New York. Connecticut, on the frontier, and most exposed, was

most insistent; Massachusetts was least impressed because, in a more protected quarter, she had least to gain and most to lose. However, four years after the federation of the Connecticut towns, delegates met in Boston from the New England As if they feared olonies and adopted articles of confederation. It was reserved for Plymbuth to strike another new note in the provision that it could not be bound by the acts of the convention until these had been ratified by the And at the sight he thought of the

intensively attempted and done. Here we find, in these quaintly phrased

and well-nigh forgotten old docu-ments, the birth of home rule, of democracy, of representative gov-ernment, of federation, of the sysag with its history and interthe early colonial partiality for a two-chamber legislative body.

The Trend Toward Union Quite as thoroughly and interestought. Most writers seeking both the Crown and the colonists fahistory and governmental out is that there was more of evoluand very few have thought to tion, selection, combination, than of class know why and when these defor its inspiration in the polook for its inspiration in the po- actual creation in the governmental forms adopted by the farmers of the Constitution. The ideal of democracy which the author shows creeping into so many documents makes all the more remarkable the disposi- study of American institutions is tion of the makers of the Constitu- penetrating and helpful.

Dr. Robert Bridges, the Poet-

Laureate of England, is el-

oquent and enduring testimony to a

invested with power and glory an office which his predecessor allowed

Not that the present laureate flouts those who wreathed him with the

reigning politicians. He fulfills it in

the artistic sense. All his work, especially of late years, represents his

own poetic age, which is seeking for

a technique through which to express

"Neo-Miltonic Syllabics"

New York: The Macmillan Company. \$2.50. of Jefferson, despite tremendous odds in organization and power, was inevitable. His forces began to mobilize when the Pilgrims sat down in the cabin of the Mayflower and wrote their democratic Covenant.

Mr. Breckenridge has made an exhaustive study of the origin in America of American governmental ideals, giving us a background for the Constitution which could be used advantageously in the schools and

colleges. More conventional, though interesting and entertaining, is "The Usages of the American Constitution" by Mr. Horwill, an English scholar. His book contains nothing novel for the intelligent American, dealing as it does with the departures from the fundamental law sanctioned by practice. Educated Amer reader, however, for whom the work was written, this book will be illuminating. Mr. Horwill is another Englishman whose sympathetic

In All Seriousness

TO J. C. SQUIRE belongs the seriousness and aloof communing pride of having done first parodic honors to English poetry, and this may be added to the list of English injustices to Ireland! For the Irishman has always made it his this for guaranteed Yeats? the Irishman has always made it his privilege "to take a lift" out of the English, a compliment—tell it not in Baile Atha Cliath!—which has been invariably and subtly returned. But by the publication of "A Green Jackdaw" the Irish may be said to have recaptured their privilege, and it is a hanny sign they are avaraging it at a happy sign they are exercising it at the expense of the Gael as well as at

the expense of the poor Sassenach. still remains that the biggest insult you can offer a man is to tell him he has no sense of humor. For by this all day; has no sense of humor. For by this you mean he has no sense of the incongruous and therefore no sense of SELL HIS COW. congruous and therefore no sense of form or proportion. You mean he is a selfish egotist, one who—as he beats his bosom—never doubts his He knows their little ways. He has own primal importance and substantiality, as though he were a portly Seumas O'Sullivan, and Joseph Camp-Atlas who voluntarily had taken on bell to perfection. And he concludes the job of carrying the world on his

The Humorist as Idealist

It has been remarked humorists are sad men: and this is understandable, for the truly humorous man is etc., with an immense amount of an idealist. He sees every man's ideal and also how far short of attaining it he falls. The humorist unveils just as we want more from Sean smugness, gives the pompous and the O'Casey; they are showing us Ireworldly wise a perturbing dig in the land is recovering her sense of ribs, admires sincerity but makes humor. Or t short work of the meretricious and never lost it. short work of the meretricious and the mannered: Puck-like, pulls the stool from under the grandiose and, in sum, endeavors to make any man who thinketh himself to be anything suddenly to be nothing at all. The humorist measures the distance between what is and what undoubtedly ought to be.

When he turns to the parody the humorist trips up the personal in art, makes for those fads and for that obtrusive individuality which at times mar the work of the greatest. The success of the parodist will be judged by the subtlety of his exaggerations and stresses. He must avoid caricature, following his victim line by line until, at the apt moment, an unexpected wink gives the show away to the reader. Thus, in "A Green Jackdaw," Mr. Macmanus amuses us but never takes us in with his victimi-John Drinkwater and A. E. Housman; but he nearly catches us in "Rura

Delights," by W. H. Davies: I gazed me up, I gazed me down, I sat me down, I stood me up, To see so many goodly things With happiness it filled my cup: "Heaven indeed would this be now I said, "If I could see a cow."

And was it Edith Sitwell or Mr. Macmanus who wrote,

Winds as sweet as nectarines Leer like Spanish tambourines; A tall ghost lifts a lucid leg As golden as a scrambled egg.

aries fight a difficult battle. And as zation of G. K. C., John the author points out, their main John Drinkwater and A. E.

A Christian Critic

This needful investigation forms the subject of Mr. Maclennan's Nor was safety within the walls of the Coburg in any way assured didly it has been carried out. For Fights among the audience, with free the author combines in an unusual interchange of missiles, were quite degree the qualities of a practical frequent, threatening to end, even when not actually doing so, in a riot; while if the actor failed to please, the ability to see the world as a

A Sure Grasp of Essentials With a sure grasp of essentials he examines such potential perils as narrow nationalism, race and color antipathies, industrial oppression, and adds thereto-unjustifiably, one would think-the "rebellious" youth movement of Germany and other strange, though not necessarily unwholesome portents that result from the war and may be only transfent.

He further discusses at some length the treatment accorded to socalled inferior races by represen-tatives of the Christian nations in various parts of the world—a sub-ject on which he naturally commands unusually complete sources of information. The value of this in-formation would have been greater had the references been invariably up-to-date. One does not always feel sure that an instance of oppression noted in 1914 or 1921 is still being repeated today. Nevertheless there is sufficient recent evidence of gross in justice toward the native population in parts of Africa by governments, trading concerns or settlers of Western nations to show that race and color wars are being manufactured through failure to observe the most elementary rules of Chris-

Abysses in Far East Unhappily these elements of elfishness and greed flourish in any industrial soil and have taken root in the rising industries of India, China and Japan, where the worst conditions of the Manchester work-ers in the first years of the industrial revolution are being reproduced.

Hole has made operatic history. Subsequent Success

There is no need to recount the the Regent Theater, London, and the possible performances at Birmingham and other provincial centers. Although produced in 1914, "The Immortal Hour" is really a nineteenth and not a twentieth century work. Its source and inspiration are to be found in a phase of art discovered first by a Frenchman—Ernest Renan about 1856, and by an enterprising Englishman - Grant Allen -only some 35 years later. This discovery of the Celt, or as the English write put it, "the return wave of Celtic influence over Teutonic or Teutonized England," brought with it much that was curious. Receding on the unromantic shore of the twentieth century, the Celtic wave left even stranger things behind it. There are, for example, still trailing clouds of Celtic twilight, the writings of "Fiona Macleod" (William Sharp), from which Boughton derived the libretto of "The Immortal Hour." Determined, as a critic has said, to be Celtic at all costs, Sharp once designed and published (August, 1892) tents of which he wrote himself under various pseudonyms. This organ of what he styled the "New organ of what he styled before the far vaster consideration which touches the depth of his nature 1. d that of art itself.

As we have had elsewhere occasion Paganism" was unique; it ran for Sir James Frazer has collected who wrote "Falstaff," but also (if Bloch's, the Italian composer dis-

of phrase, melodious or not-

and sing, to make a teapot and cup dance, to disguise a baritone and a Paris, Feb. 16 | as one might imagine, particularly SINCE Fauré and Debussy, Maurice Ravel is the only French musician whose latest works are awaited with eagerness. We have a certain number of "masters" in possession of a perfect métier and a privots and springs of extraordinary of extraordinary and springs of extraordinary an pitifully enough. The public had good sport guying the childishness of few restless and adventurous young pivots and springs of extraordinary composers whose restlessness is not fineness, and he fixes, with marvelalways legitimate and whose adven-tures are sometimes barren. Mau-just as a watchmaker adjusts a tiny and turns to ridicule the comic derice Ravel, on the contrary, gives us screw or sets a ruby. The initiated,

bulent and unruly like a Berlioz, acteristic sidelights on the genius with whom composing took the form of Ravel. He is there, all complete, of a frenzy (but should one take the with his extraordinary qualities, his word of this volcanic illusionist?). The book is by Colette. It has, like everything this extraordinary woman writes, a profound poetry, a rare sensibility, with a feeling for nature and a delicate perception which is entirely her own. The plot is charming. A lazy, sulky schoolboy revolts against parental discipline. He tears and ingenuity of writing, made him his exercise books, upsets the fur-suspect to short-sighted observers niture, smashes the armchair, makes his exercise books, upsets the fur who imagine that orchestration is an a rent in the tapestry and teases his

Suddenly the familiar objects that surround him revolt in their turn the sofa refuse him their services and reproach him bitterly. The tea-pot and the cups he has smashed dance a fox-trot, and the little people fiers sometimes escaped him. He sought for powerful thoughts, for lively images; he took fire and sprang forward. And yet in this unanother; even the fire closes his disciplined vehemence, he said what

A Revolt Against Tyranny

books steps a princess from a fairy tale, who makes the child realize all the consequences of the action which has put to flight her first dream and her first belowed. her first beloved.

The child seeks refuse in the garden, but there he finds even severer judges; the trees whose branches he has broken or whose bark he has slashed in play show him their injuries; the birds, the frogs, the bars, the dragon-fles re-mind him of his naughtiness. Pushed, threatened, tormented, the terrified child shouts the magic word: "Maman." The animals are then moved to pity, they forgive him and

take him back to the house. drama. He spoke plainly and roundly Under its childlike exterior, this tale, which is modernized Andersen, obviously contains a deeper meaning. We need the indulgence of art appears to us today, 25 years Without man's despotism, animals and things would live happily. It is man who most often causes disorder, injustice, violence and hatred to reign in the world.

Difficult to Produce One can guess the difficulties of production in such a work. Actually, in the present state of theatrical mise en scène, they are, one may say.

less permitting a long pause, between movements of a symphony. If late-comers are to be admitted, why raise the magisterial hand against manifestations of approval? The mood is broken in any event. And if there is be no applause, why not go on with the story?

charming, was heard with pleasure.

The Andante and the Menuetto pro-

ceeded at a rather German pace, it

It is a curious custom, though,

Mr. Koussevitzky evidently has a strong affection for Strauss. At two pairs of concerts this season the "Alpine Symphony," at another "Tod und Verklärung" and now "Don Juan." Or perhaps the conductor wants to remind his audiences that there was a time when Strauss really looked as if he might become Richard the Second. By all means, if we are to have Strauss, let it be the dazzling young Pretender of those earlier years. Except for one most distressing lapse, the performance vesterday was brilliant. So was that of the Ravel, though the placing of it after the Strauss was not the

Parallel Dates

It is curious to notice how this lift its head during the age of rationalism, the so-called "prosaic" eighteenth century. The parallelism of dates between poets and painters is striking: Thomson, author of the bath must be just so many degrees, "Seasons," was born in 1700, and ing business.

Not a touch of kindergarten; always
"Yes, one please!" he assented, a little barrack of serious learning.

STOCK MARKET DROP SEEN AS READJUSTMENT

Overbought Condition Said to Be Main Cause—Business Outlook Favorable

NEW YORK, Feb. 27 (Special)-The downward trend of stocks all week and the severe break in many issues yesterday were attributed to a variety of causes, regarding which there was not complete unanimity of opinion.

It was generally agreed, however, that what happened in the market this week was a natural sequence to the continued advance that has extended over a long period.

During that time there was only temporary and moderate reactions. A large volume of loans was piled up by the brokers who were compelled to go to the financial institutions from day to day to borrow funds with which to finance the extensive speculative operations in stocks of their custom-

Although an effort has been made in the last few weeks, particularly since the figures have been made public by both the Federal Reserve Board and the New York Stock Exchange, to convey the impression that in rela-tion to the large number of stocks now being dealt in on the New York Stock Exchange and in relation to other lines of business these loans are not large, it must be admitted that a huge sum of money has been tied up

Surprise at Loan Total

Surprise was expressed in some cir-eles yesterday over the failure of the Federal Reserve figures to disclose a large decrease in the borrowings of brokers. The substantial expansion in the amount of money borrowed out of town was taken as indicating that the greater part of the funds being used for speculative purposes in Wall Street was still coming from sources outside of its limits.

Loans were called yesterday to an estimated extent of \$25,000,000, and the 5 per cent rate on demand loans that had prevailed for several days was marked up to 5½ per cent, at which level it stood until the close of busi-

It was assumed that the calling of loans was partly in preparation for the large disbursements on March 1. The opinion prevailed in the minds of many speculators, however, that the payment of loans was asked for also

as part of a well-defined plan to bring the total down.

One of the most significant features of all the developments in connection with the money market yesterday and throughout the week was that borrow-ers appeared to experience no difficulty in getting the money they needed at

the rates quoted.

It will be interesting to note the trend of the money market after the turn of the month is made, as it will then be possible to get a better idea of the purpose for which loans have been called in. Payment has been asked for steadily every business day recently. steadily every business day recently, with the possible exception of Wednesday, when it was reported that they

were allowed to stand. Technical Readjustment

best opinion is that the selling of stocks and the extensive declines in many issues largely represented a re-adjustment of the technical position of the stock market itself and did not reflect any adverse conditions.

Of course, there was heavy short selling by the professional elements: It was suggested that the volume of business in the country must be large, otherwise the loadings of the railroads for the week ended Feb. 13 would not have been in excess of those for the preceding week and more than 13,000 cars larger than for the corresponding week a year ago.

Week a year ago.

It appears to be true that just recently the buying of some kinds of steel products has fallen off moderately. Production and shipments have gone forward on a large scale. Naturally this has reduced the volume of orders on hand, and it is expected that on March 10 the United States

Saturally this has reduced the volume of orders on hand, and it is expected that of march 10 the United States Steel Corporation will report a rather of the Pethielmen Steel Corporation will report a rather of the Pethielmen Steel Corporation to issue \$3,00,000 of preferred stock may be reasonably taken as evidence that its directors. The proposal of the Bethielmen Steel Corporation to issue \$3,00,000 of preferred stock may be reasonably taken as evidence that its directors. The passage of the tax bill and its becoming effective by reason of the signature of the President ought to believed that it will result in a considerably larger volume of funds seeking investment in securities. Many observers believe, also, that it will exceed the present of the contive to increase their net incomes.

Rall Issues Disappointing

Although disappointment has naturally been expressed over the failure of Congress and the Interstate Compination of the standard issues like New York Central and Actions, of the principles was at its height. Earnings for January in the case of some of the where they were when the big speculative movement with a view to higher prices was at its height. Earnings for January in the case of some of the standard issues like New York Central and Actions, for incases they have not only held up well but shown big gains. This has been holdications only during the last few days that greater activity with respect to railroad cooking the prices was at its height. Earnings for January in the case of some of the incomparison with last year. In other cases they have not only held up well but shown big gains. This has been holdicated by the shown big gains. This has been holdicated by the substantial Juyers of the dividend paying shares.

NEW LOWS FOR WHEAT PRICES

Buying Power Lacking, and Bears Aggressive-Canadian Stocks Heavy

DURING WEEK

CHICAGO, Feb. 27 (Special)-Wheat prices made a false show of strength early this week, only to turn weak later, and make new lows all around for the month. Early week strength was due to short covering and reports of a slightly better export

The buying power was not there to ustain the market, however, and the last few days has witnessed persistent liquidation. Outside buying dwindled to small proportions, and it was the impression that big eastern shorts were pressing the market, coincident with the heavy selling of stocks.

The general news was not of a sort of influence any big change of prices. Liverpool was relatively steady at times, but there was no aggressive foreign buyers, consumers abi ing content to wait for declines to buy, and then to buy only in moderate quantities. Canadian wheat is being pressed for

sale a little more vigorously on the advances, and this naturally helps to put a damper on bullish enthusiasm. Argentina is not shipping as heavily as last year, and European mills are cautious buyers owing to the indif-ferent quality of the first shipments of Plate wheat. Russia is not shipping in any vol-

ume, and non-European countries are taking considerable quantities of both Australian and Pacific coast wheat, the latter both from this country and

Crop news so far is without much crop news so lar is without much significance in this country, but au-thorities are generally agreed that there has been little evidence of serious winter killing. Practically all of the winter wheat belt has had plenty of moisture and winter conditi not been such as to cause any special

Receipts of wheat are moderate, visible stocks are decreasing moderately, and cash wheat prices are holding at substantial premiums. Flour trade is of fair average volume, but there is not much buying ahead. Canadian stocks are heavy, and virtually offset the smaller stocks in this country. try compared with a year ago.

Much of the recent selling has been by longs who were discouraged by the failure of the market to hold the re-

cent advance. Technically the market is in better shape than for some time as the result of the liquidation.

Corn maintained a firm front for the most part, but the strength was in part credited to the closing of spi between wheat and corn, there being no change in general conditions to make for much strength. Rye was especially heavy. Oats did not do much either way.

BEARS ATTACK MARKET WITH

Another Large Volume of Forced Liquidation in Short Session

rive against the common stock of the Foundation Company, which col-apsed 21 points, was the feature of

number of vulnerable specialties, ning after the sharp break of yesbrought out another large vol-f forced liquidation from traders who were unwilling or unable to meet their margin calls. Strong bankg support was provided, however, r United States Steel common and number of other high grade indus-

The excellent January earnings statements shown by several of the leading railroad systems also served to restrain the selling of the railroad shares. American Brake Shoe & Foundry dropped 15 points, General Electric recorded an extreme loss of 7, and New York Canners dropped 10.

On the other hand, South Porto Rican Sugar was bid up 8½ points, Commercial Solvents A 5¾, May De-partment Stores 4½, and Union Tank Car, United States Cast Iron Pipe and du Pont 3 to 3½, but most of the top prices were shaded when acute weakness developed in Foundation

The closing was heavy. Total sales approximated 950,000 shares.

Foreign exchanges opened steady, demand sterling ruling around \$4.85 9-16, and French francs at

3.67½c.
Initial bond dealings today brought no change in the character of the market, and prices continued to waver in sympathy with the irregularity of stock trading.
Chesapeake & Ohio convertible 5s moved up almost 2 points, and Skelly Oil convertible 6½s recovered a fraction of their recent loss, but selling activities seemed to predominate in the general run of railroad and industrial liens.

Eastern Cuba 7½s and Remington Arms 6s were among the conspicuous leavy spots.

Foreign and United States Government obligations were firm.

"Interrupted Again"

AN IMPORTANT business conference interrupted by "Mrs. Carter to see you again, Sir,"... a friend's widow concerned over some detail of the estate her husband left in his care.

FEW business men of today can spare the time necessary for a careful administration of an estate, or assume the duties that are more properly those of an experienced specialist. Could you, in all fairness, expect this service of your friend, thereby leaving to him and your heirs the many awkward situations that in all probability will develop from such an arrangement?

THE Trust Department of the Old Colony Trust Company, as executor and trustee, has helped many men to avoid such occurrences. The personal equation enters largely into our Trust Department relations, and its officers are never too busy to talk over with you or your heirs the nature of our services as Executor and Trustee, either alone or acting with some family friend.

> We have prepared a booklet, "CONCERNING TRUSTS AND WILLS" which discusses this subject in detail Ask for Booklet SR-3

RECREATIONAL

SETS NOW FOR

Browning-Drake Receiver

Tentatively Considered

Most Adaptable

WASHINGTON, Feb. 25 (Special

Correspondence)-The shoals of

Cape Hatteras, North Carolina, which

have been accepted as synonymous

with the deprivations of sea life at

its worst, is soon to be robbed of its loneliness for those who inhabit this isolated spot. Radio, which the radio editor of The Christian Science

Monitor has so vividly described as "outriding the storm," is to be im-planted at this point as well as at

more than 200 other stations of the United States Coast Guard.

In a back room of coast guard

headquarters, in Washington, tables

that line the sides of the workshop as well as nooks and corners are

completely covered with radio apparatus. Out of this miscellaneous

assortment of radio parts are being built five model radio receiving sets

for distribution to as many coast

guard stations and if these units can

justify in practice what is claimed for them in theory, eventually about

250 sea-coast stations will be thus

equipped. It marks a definite and

systematic plan for providing the coastal outposts of civilization with

that universal entertainer which dis-

from which evolved the Browning-Drake type of radio receiver, to the

scene of coast guard station person-

The two first Browning-Drake re-

ceivers being built, one of which

sets is borne by the so-called "recre-

to its structural features.

has been completed, will be in-WEAF, New York City (492 Meters) stalled at the coast guard stations stalled at the coast guard stations located at Lewis, Del., and Cape Henry, Va., respectively. They are designed especially for radiocast reception—operating over a band of wavelengths from about 200 to 600 wavelengths from about 200 to 600 two one-act plays by the Irvine Players; Chandler Mixed Quartet (vocal); Ross Gorman and his orchestra; Vincent Lopez and his orchestra. meters-and the cost of equipping the stations with radio receiving

ation fund." .That is to say, each WJZ, New York City (455 Meters) coast guard station is allotted a small fund for providing recreation for its personnel, which numbers about fifteen.

Demonstrating excellent judgment, the officers and enlisted personnel, which some constraints are considered by the constraints of the constr

ment, the officers and enlisted personnel at these stations, in most instances, have determined upon radio as the medium which affords the best entertainment for the monetary expenditure involved. Hence their expressed wishes are being forwarded to headquarters in Washington, where the radio receiving sets ment, the officers and enlisted perton, where the radio receiving sets

98½ warded to headquarters in Washing-101½ 985½ ton, where the radio receiving sets 101½ are being built and shipped to them 27% at actual cost of parts. Tentatively, 87 at least, the Browning-Drake re-WGBS, New York City (316 Meters) are being built and shipped to them at actual cost of parts. Tentatively, at least, 'the Browning-Drake receiver has been selected as the radio circuit best suited for this purpose—being selective, having sufficient volume, and reasonably inexpensive WOR, Newark, N. J. (465 Meters)

work, N. J. (465 Meters)

to operate. The Browning-Drake
tuning units are being bought by the
coast guard, the cabinets are supplied by its stock room, and from
this equipment the completed receiver is being assembled and wired.
These will be known as "recreation receivers," and are not to be
confused with the extensive radio
equipment already employed by the
coast guard for the handling of
business communications between
one cutter and another and between

Advocates of war as the only method of settling differences between nations have recently

Washington, Lincoln and the Sword

been making use of Washington's and Lincoln's Birthdays as the basis of "arguments" in their persistent campaign to cast discredit on all who are striving toward organization of the world for civilized peace.

Grouping by innuendo all their opponents in the category of "pacifists" and exalting the military portions of the labors of the great American leaders, they ask with fervent assumption of patriotism: "Was there anything of the pacifist about Washington or Lincoln?' Anticipating the answer to this, they exclaim: "We are not ready to abolish the twelfth and twenty-second of February!"

A letter from a supporter of war printed lately in a Boston newspaper of wide circulation furnishes a characteristic example of this kind of appeal. The writer, after rapping "pacifists," says:

Lincoln owes his fame to the fact that through four terrific years he waged victorious war for the salvation of the Nation. Washington would never have been for eight years President of the United States if he had not for eight earlier years waged equally unflinching and valorous war for the independence of the Nation. There was absolutely nothing of the pacifist about either the father of his country or the savior of the Republic.

This confusing appeal to unreasoning emotion leaves entirely out of the account the essential facts in the public lives of both Washington and Lincoln and the causes that made it necessary for them to "draw the sword." It neglects to state the fundamental truth, that both American heroes were compelled against their wills to use an instrument which they detested, abhorred and denounced, in order to prevent those who believed in war from robbing their Nation of its rights, its liberties and its peace by the sword. It neglects to point out that, while Washington and Lincoln were justified in employing the only means at hand to protect the Nation, those who caused the wars for their own reprehensible purposes were not justified and hence their wars were not. It neglects the basic fact that all wars have two sides. That one side is innocent and right furnishes no ground for approving war as a method of civilized human action. If both sides were right according to their own lights, the war would be even more indefensible.

The Nation that chose Washington as its leader and put the sword of defense in his hand did so according to its immortal "Declaration" in order to resist war-makers who aimed to take from it "certain unalienable rights," among which were "life, liberty and the pursuit of happiness." It did so in order that its people might enjoy their unalienable rights in peace. That Nation's attitude toward war and militarism was disclosed in two of its most forceful charges against the King who was using his armies against its peace: "He has kept among us, in times of peace, standing armies, without the consent of our legislatures. He has affected to render the military independent of and superior to the civil power." Washington used the sword simply to beat back militarism and to make it possible for America to enjoy its rights in peace. His whole life was given to the task of organizing society in such a way that it could keep and enjoy its rights without resort

Lincoln gave his life to endeavors to preserve unalienable rights in organized peace against those who would destroy those rights by military force. He did not draw the sword until militarism committed its overt act and struck the first blow by firing on Fort Sumter. He cast aside his sword the moment that the sword of aggressive enemies of human rights had been broken. If ever a man was martyred in the cause of peace by the makers of futile war it was Lincoln.

The masses of men throughout the world who are organizing it to make war both unnecessary and impossible are engaged in the work to which both Washington and Lincoln gave the most and the best of their lives; that is, to arrange human affairs so that the unalienable rights of both men and nations shall not be infringed or taken away by force. The millions and the leaders engaged today in this same work will not be turned aside from it by the hurling of such epithets as "pacifist" or by misrepresenting such great peace-preservers as Washington and Lincoln.

The action of the British Minister of Labor in sending out invitations to his fellow Min-

European Governments and Hours Regulations

isters in France, Italy, Belgium, and Germany, to attend a conference to discuss the possibility of an agreement, having for its object the uniform regulation of hours of work in the respective countries, has evoked

some doubtful questionings among trade union leaders on the Continent. These arise from the fact that certain more or less official references to the matter have lent color to a suggestion that the conference will not necessarily be concerned entirely with the question of simultaneous ratification of the Washington Forty-Eight-Hour-Week Convention of the International Labor Office.

In the discussions that are taking place at the moment, however, this point is subordinate to one which the trade union leaders regard as vitally important—that is, whether the proceedings at the conference will increase or lessen the prestige of the International Labor Office. If it were definitely the intention of the British Government to work for a general ratification of the forty-eight-hour-week convention, these leaders suggest, its action would undoubtedly strengthen the position of the Labor Office at a critical period in European industrial history. Moreover, if the British Government succeeded in this object it would show that the statesmen in the five most important industrial countries accepted fully the basic idea of international effort, through this section of the League of Nations, to raise the

conditions of the workers in backward countries, and to realize the greatest possible measure of equality.

The outcome of the conference of the five ministers is therefore awaited with keen anxiety, which has been accentuated by the action of powerful groups of employers in several of the countries, since the possibility of definite government action has been suggested. In Germany the official intimation to the British Government that the Minister of Labor would be willing to take part in the proposed conference has been followed by an intensive employers' campaign against ratification of the Washington Convention, on the ground that reparations cannot possibly be paid if hours are limited to forty-eight per week. In Belgium, where the Socialist Government has introduced a ratification bill, an equally determined campaign against it has been initiated by the employers' associations. In Great Britain there is similar opposition, and the engineering employers have recently expressed the opinion to the Government that ratification of the Washington Convention is not the most desirable way of bringing about uniformity of working conditions in the various countries. It is believed that if the governments, influenced by this pressure of employers' opinion, suggest a modified form of agreement on hours, a difficult situation will arise in the Labor Office, and that the workers would interpret such action as an attempt to undermine the position to which the Office has attained.

The willingness of Congress to assume responsibility for making even greater reductions

Now for Still Greater Economy

in federal taxes than were demanded by the Administration has been accepted by President Coolidge as an assurance that it is prepared to reinforce its deliberate judgment as expressed in the non-

partisan tax bill by an economical readjustment of pending appropriations. In no event, according to the President's declared view, will the piling up of large deficits be permitted. There must be even greater economies in public expenditures than were originally planned if the net revenues of the Government are to be curtailed at their source. If the people contribute less, then they must spend less. Which is a tolerably fair rule in any business or in the arrangement of any budget.

So those senators and representatives who have been quick to inform the "folks at home" that they have thoughtfully joined in the plan to reduce the common tax burden must now forgo the hope of winning additional applause by their successful manipulation of some cherished appropriation bill. Word has already gone from the White House to the Capitol that this amended economy program must be adhered to. While there is no threat that a prompt and unqualified veto awaits all measures providing unnecessary appropriations, such an assurance may easily be read into the verbal message conveyed from the executive offices by Representative Tilson, majority leader of the House, after a conference with the President.

It is well known that President Coolidge has tolerably well-defined theories which govern his thrift program. He believes, first of all, that the Government, like the individual, should always have a reserve fund. He insists that public business, instead of being conducted on a narrow margin or upon the basis of a deficit, should always show a fair margin in the bank. He has insisted that the national sinking fund be added to annually, thereby making possible steady reductions in the public debt. By its own action Congress has reduced the estimated revenues some \$57,000,000 beyond the point indicated by the President and the Secretary of the Treasury. It is a simple problem in arithmetic. To just that extent, the President is said to have indicated, must proposed expenditures be curtailed.

The appropriation bills which are said to face the first reduction are the public buildings measure, the bill providing for increased pensions for veterans, especially those of the Spanish-American War, good roads development bills, and that providing for river and harbor improvement. It is not intimated that these appropriations will entirely fail but it now seems probable that they will all be considerably reduced. It is said that the President urges that all individual appropriation bills be laid aside indefinitely.

Senators and representatives express the hope that progress made by Congress in disposing of pending business will make possible an adjournment by May 1. The shutting down of the legislative machinery at that date would aid greatly in insuring the necessary economies. It would, at the same time, increase business stability and assure the continuance, uninterruptedly, of the prosperous industrial era which nearly everyone is enjoying. The orderly functioning of the legislative and administrative powers of government cannot fail to discourage, if not to silence, political unrest.

For a third of a century, more or less, the problem of the trolley car franchise has been a

The Motorbus and the Trolley Car

continuous or recurring one in many American cities. Time was, and not so long ago, when vast sums were expended by rival lobbyists and charter seekers in efforts to obtain desired and once tremendously val-

uable concessions in the form of long-term or perpetual franchises insuring a monopoly to surface cars for the transportation of passengers. Emphasizing the sudden and almost revolutionary change which has taken place, the company which now holds a monopoly of the surface trolley car system in Manhattan, the center of New York City, voluntarily offers to surrender its rights and privileges in exchange for an exclusive franchise authorizing it and an associated concern, the Fifth Avenue Coach Company, to operate bus lines in the territory

named. It is explained that the granting of the permit requested would immediately render worthless some twenty-five miles of track now in use, and would withdraw from operation approximately 200 surface trolley cars. The bus lines, which would supersede the street cars, would be operated in both longitudinal and crosstown platoons, service on the former being based on a ten-cent fare, with a universal transfer privilege, and on the latter on a five-cent fare without transfers. Ten cross-town and three longitudinal routes would at once be provided for the accommodation of patrons.

This sweeping proposal which, if accepted, would be as revolutionary as the change which was wrought when the trolley rendered the old-time horse-car obsolete, marks but another phase of that somewhat more gradual change which is taking place on the country roads and highways. Within the last two or three years the stage coach, in a refurbished and much more attractive form, has come back to claim an increasing share of the patronage once monopolized by the steam railroads and interurban trolley systems. The coach-and-four, picturesque and indispensable though it seemed, grudgingly yielded the highway to the railways. Similarly the horse-drawn trams of a generation ago gave way to the trolley, which was regarded as the last word in urban transportation.

It is no mere whim or caprice which prompts the preference of the tripper for the motorbus. But how constant, one is inclined to ask, is this patron? What will come to displace this newest utility? Will America, and all the world for that matter, one day discard the palatial motorbus for some device which will carry them aloft and through space at a still greater speed and with less discomfort? One looks backward with more confidence and assurance than one looks ahead. The bus franchise which today is so highly regarded may, a few years hence, be offered in exchange for the exclusive privilege of operating air taxicabs over a prescribed area.

In sending out Messrs. Flesch and Zetlin. professors of the violin, Mr. Bailly, professor

Ennobling

the Cause

of Music

of the viola, and Mr. Salmond, professor of the violoncello, to present quartets on the public concert platform, the Curtis Institute of Music of Philadelphia may be said to illustrate at once an assertive and

a timid streak in Americans. Assertive, because it is proclaiming the determination of the people of the United States to educate themselves in tone; and timid, because it is confessing the willingness of Pennsylvanians, to say the least, to learn the art of instrumental performance from European teachers.

Nothing new, granted, in these positive and negative aspects of the national character; but interesting the Curtis manifestation of them must be regarded, just the same. For no opportunity, surely, in the educational field has been so much neglected as the musical one. Formerly, the universities scarcely more than tolerated music study; the schools declined to give credit to music students. Commercial conservatories and studios had the whole thing, practically, to themselves. Rather poorly did the American, under such circumstances, learn his do, re, mi. But of late, the Juilliard Musical Foundation in New York, the Eastman School of Music in Rochester, N. Y., and the Curtis Institute have organized, each vastly well supplied with funds; and the outlook seems remarkably bright.

If anybody in the three institutions has atproblem with specific music-teaching its true place in the American scheme of education generally, it is Eugene A. Noble, head of the Juilliard activities. If anybody has set about looking after original American effort in composition, it is Howard Hanson, director of the Eastman School, Their assertions have been tempered with timidities. too. But they have raised music to a dignity unimagined in other days. Those in charge of the Curtis Institute, likewise, are ennobling the cause, though they work from without rather than from within the native heart and intel-

Random Ramblings

"To be good citizens you should read newspapers, "To be good citizens you should read newspapers, and bring your children up to read newspapers, so that you will know what is going on," was part of the advice given to a group of newly made citizens in New York recently by Justice Selah B. Strong. His suggestion would have been even more timely if he had added that they should take particular care that the newspapers selected are good ones.

In 1881 the racing cutter Mischief successfully defended the America's Cup against the Atalanta over a course off Sandy Hook. The latter, like many such famous yachts before and since, has left the sea by way of the scrapper's yard, but Mischief is still afloat, being used as an oil hulk to bunker vessels in Boston harbor. "He that climbs highest has the greatest fall."

The War Department plans to re-tailor the army coat, replacing the "choker" style collar, adopted over 100 years ago, with a roll collar, showing shirt and tie. One naturally sympathizes with the soldier, but any move to make war more attractive is usually frowned upon nowadays.

The weather bureau has coined the word "smog" to signify a mixture of smoke and fog. The Washington Post suggests "sneet" as a derivative of snow and sleet, Might not "britsun" be included to denote the bright and sunny day?

Try this on your dictionary: Those seeking to become conversant with pronunciations which may seem controversial may devote inquiry into the status of xylophone, cornet, violoncello, and ukulele.

A New York newspaper headlines its story in this fashion: "Hotel Breevort Is Menaced by Liquor Padlock." But in reality the hotel is menaced only by its

Getting right down to rock bottom, how about clearing the sidewalk before the snow "sets" as a test of good citizenship?

Whatever else may be said of the coal situation, it cannot be denied that it is a burning question.

By making a concrete debt offer, France could cement friendship.

The Wise Old Man of the Sea

A deep rolling wave plashed full on the rock face, the Old Man of the Sea, so that white foam ran from his hollow eyes and deep-creviced mouth. The bay rumbled its surface in long, even runs, thumping on the yellow beachway. The old face looked worn in the evening light, but it was touched with the splendor of its setting.

To the west ran the sand dunes, a golden strand set off by the high peak of the dark Chang Li mountains.
The round-knobbed Lotus Hills spread from the strand back to the sunset. Their green of locust and pine was deepened by mist shadows. Great jagged areas of black cloud covered the western sky, while open spaces of deep gold made a magic sea with its volcanic continents.

The open space of the bay was a stirring sight of colors, spreading from the heaviness of the west to the treeless point where the stone white lighthouse led to the wider sea. The jutting red rock points were flicked and sprayed, while swallows shrilled above the twish and thud of the water. The restless bay was cut in currents of drab blue and green. Then a sky-line gray came on which mirrored the broken moving clouds and lent a sense of distance to

Lin Wei sat by me on the sandstone cliff overlooking the rock pile where the old sea face had waited the ebb and flow of a million summer nights. I had come to the point in the times of all light and tide; to see early sun tints brighten his cracked features, or a mystic evening light silhouette him gnarled and broken; the tides would present him bathed and shining, or burdened down with muddy weed and broken shell. Lin pointed to that scarred forehead and told me what all the fishermen are familiar with, the story of the Old Man of the Sea:

"After the days of the great Khan a northern prince Monhol Hsi, was known throughout the sea country as an oppressor. His sailors destroyed all trading vessels which did not carry his phœnix standard and pay tax from his ports. He sent his collectors through the grain and fruit plains to collect his wealth. His cruel, wild soldiery spread terror down to the hills where the Great Wall spreads its serpentine 10,000 li.

"Monhol Hsi was a tall and valiant warrior. He was known to have beaten ten western nomads with his great bronze spear. He was a champion of force, unlike the kindly Han people, who hold reason above the battle ax and the scholar above the soldier. Monnol spurned the Buddhist monks who carried sacred books to his hill palace in the north country. He laughingly said: 'I will have none of your shaved heads and begging bowls. I will smite down thousands of your people and rule the world with their spoil.'

4 4 4 "A learned scholar from the oldest temple of Peking told Monhol that the sages taught that a good ruler was the benevolent father of the people. Then the prince shouted and cried that he would threaten the very walls

of the capital and destroy such weak-hearted teachers.
"The mighty Monhol, in his riches and pleasures, forgot
the powers of heaven and his suffering brothers. He thought only of new conquests.
"At the time of the eighth moon festival he gathered

his ships and warriors to sail on southern conquest. Tall skin-sailed junks of redwood rested like great hawks in his north harbor; the water was black with little, highproved shore boats, carrying out the valiants who would soon spread blood and storm in new ports of our Flowery

Monhol stood erect and unmoved above the song of boatmen, the excited voices of his braves and the clatter | sun.

of their arms; he watched like the unbending black tree. Beside the conqueror was his trusted councilor, Lee Yin, a bearded, deep-eyed magician, a diviner who knew the lore of heaven's way. As they walked up the boatway, a great blue gull-like bird fell by the carved wood bow, screaming out in long, shrill cries. The wise and learned Lee spoke nothing of this foreboding, for he knew his chief would but defy heaven's will and call down more calamity.

"The ships came through the green islands of the Great Peaceful Sea with warm summer air pushing the sails gracefully to the south. When out on the open spaces a hot calm came over all the crowded ships; a time of stifling wait before the break of a wild sea's anger. After these hours of heavy calm, the fearful east wind gathered the boats in her great swells and rushed them here and there among the waves. Some were carried to unknown open places to perish; some were swept to homeward shores. The heavy redwood boat of Monhol was swept into the great bay. Hour after hour the seamen battled

"Ti. cold breath of a falling heaven crashed them straight on the peaked rocks off the deep black mountain. The proud ship broke and her heroes were conquered. Not one victim returned to tell the North Kingdom of this final defeat. Monhol was lost in the deep waves, unyielding as the north hill tree. The old counselor, Lee. clung to a wooden beam, and, buffeted and wounded, fell from a wave crest upon the rocks near the sea face. With his weak arms he clung to the slick red stone and prayed, and pressed his breast to the cold stone forehead. No gods heard his late repentant prayer, but the knowing lips of the sea face opened to him these words:

"Ten thousand years before Yao and Shen I was upon this bay, a lone sentinel. Through time have I watched land and sea, the creeping life of men in struggle on the

plains and their mad voyagings on the waters. "Know I thus of the powers of deep caverns and high places, the will of forces toward the man creature: the gentle lifting of tide, the golden splendor of the moon, the pale-eyed flowers and the love of white birds on the sands: the rushing anger of black weeping heavens, the fire that cuts sore wounds in the bosom of the bay, the crushed-up folds of shells, the battered fish and incoming wreckage of the storm.

"'Amid this know I sure that Justice rules, and when some creature defies the upholding right, the flood and dark will break. My battered self tells of its frequent beating; and so long as earthly creatures fling out in reckless conquest must destruction come. Can I abide to see the good festival when only gentle tides and even light may give me Rest.'

"Old Chou, father of the cliff fisherman, found the councilor, Lee, waiting for his end amid the washed-in remnants of the storm. As he lay there he poured out the oracle which the stone sea face had spoken. His resting place in the cedar grove has been close, for these centuries, to the roar that still sweeps in human wretches in stern judgment.'

Out on the bay a paintless junk dived and climbed in the wave depths, swished on by the long, gnarled oar of the brown-shouldered boatmen. Their stolid chanting came in, wavering on the wind, "Wo-ho-ho-ho!" White terns dipped the wave crests, their fearless cry a shrill challenge to the coming storm. Lin Wei's face was buried in his hands. I quietly left him with the Old Man of the Sea, and turned to the last gold rift from the hopeful

The Week in New York

NEW YORK Unraveling the meaning of laws passed by Congress, it appears, is an endeavor in which the solicitude of the citizenry is matched occasionally, and even exceeded, by the members of Congress themselves. The mere passage of a bill, according to the information divulged in a speech before the Toy Fair Chamber of Commerce here this week by Senator George H. Moses of New Hampshire, is in these days of quantity production no assurance that the Nation's lawgivers are sufficiently conversant with it to be its oracles. The annual income-tax regulations, adopted after each provision has been everlastingly aired by oratory, leave the senators, he says, and inferentially the representatives, still in need of an expert from the Treasury Department to help them fill their own blanks. Many citizens, of course, will be inclined to wonder less at this than at the Spartan perseverance that leads the congress men to require by legislation feats that they, equally with their constituents, find too strenuous to perform.

The campaign women in New York State are waging for the extension of jury service to include members of their sex has at last discovered a male gladiator willing to cross epithets and aphorisms with the best of them. Before a meeting of the League of Women Voters at the Bar Association last Saturday night, gathered to mobilize the forces in anticipation of the march on the Legislature at Albany this week, Edward B. Boies, a New York attorney, heralded in advance and armored only with opinions of doubtful efficacy from such marksmen, cast himself into the lion's den clinging to the assertions that women were too uninformed in affairs and too impractical to serve. After stabbing him with sharp retorts during his address, and fencing him with piercing questions afterward, the women at last collected what would presumably be their judicial demeanor and awarded him a verdict of enthusiastic applause; which, of course, may or may not prove that he was right.

A début at the Metropolitan Opera House that has not brought the financial return some débuts do was brought to note this week by the "sandwichmen" who represent the vocation their name designates in John Alden Carpenter's new ballet, "Skyscrapers," being presented there. The power of the press in behalf of a "boom" for themselves has just been invoked with an initial success by some of them, who describe themselves as "down and outers," in the following letter to the editor of the New York-Times:

Would you kindly give us, the Sandwichmen in that uproar called the Skyscraper that is playing in the Metro-politan Opera House, a big notice or boom us? We are all Down and Outers, and all we get for that part, carrying the signs, is the Measley Sum of one dollar a performance.

If you do this, perhaps Mr. Otto Kahn and the rest of the Stockholders might open their purses and give us a little more. We have all been Sandwichmen on the public streets and the lowest paid sandwichman gets at the lowest \$2 a day. So Atta Boy for us.

(Signed) Skyscraper Sandwiches, Metropolitan O. H.

Metropolitan O. H. * * *

The frontier moved back closer to Broadway during the recent intensive period of winter. The town of Nyack, thirty miles from Times Square, reported that a number of wild deer had not only come so close as to fraternize with some of the citizens in the outskirts, but that a few had even taken up winter quarters in the town itself. A doe made herself at home one cold night on one back porch, remaining there until disturbed in its bower by too many curious eyes. A herd of seven or eight, according to the interested townsmen, finding the foraging difficult under the heavy snows, availed themselves of what to all appearances was a hospitable haystack. Civilization, on the whole, it seemed, though offering many nuisances, did not appear to have been quite so bad as they had suspected.

Washington's Birthday, for all the ceremonies and the trenchant speeches in which the Father of His Country was aligned on all sides of current issues, was honored hardly more aptly anywhere than in the police court of Magistrate Frank Georgio in Long Island City. The same inability that, according to legend, overcame Washington as a boy in his father's cherry orchard, reappeared on his birthday in a youth who had been arrested for speeding

over the Queensboro Bridge. He was arraigned, and, omitting even the familiar exordium, said the charge was true. Nor was the corollary emotion lacking. "For so prompt an admission of the truth," said the magistrate, inheriting the paternal rôle, "sentence is suspended." Thereupon, paralleling the original, the youth apologized, thanked the court, and said his lesson would serve well as a memory and a guide, and the impromptu celebration was complete

An antique sale, under the conservative auspices of the Metropolitan Museum of Art, in which the objects, dating back among the B. C.'s, can be bought at such bargain s as \$3, or even \$1, is attracting patronage from experts in the field as well as from tyros among the casual visitors. Several thousand pieces of sculpture, pottery and glass, excavated at Cyprus, and representing the art of the period between about 400 A.D. and 3000 B.C., are being sold from the museum's collection because they are duplicates of an already widely representative display Bowls, jugs, vases, lamps, animal figures and children's rattles are among the quaint pieces, done in various materials and illustrating with their designs the early dissemination of ideas through the medium of commerce. This dissemination, too, it appears, still has some time to run, for among the many large and small purchasers have been representatives of electric lamp manufacturers of the ultramodern world; seeking specimen lamps from the Cypriote tombs and temples to exhibit by way of comparison, and possibly to copy, or for something novel in designs.

Regarding the Proposed Bread Monopoly To the Editor of THE CHRISTIAN SCIENCE MONITOR:

The proposed benevolent Ward bread monopoly recalls to thought a book I once saw which prophesied as our future civilization a benevolent feudalism.

A private monopoly is hostile to the basic idea of representative government, even were it organized sincerely and run eternally with a benevolent purpose. It is an infringement upon the right of self-government, self-reliance and initiative, and it creates an extragovernmental function of the gravest significance in that it affects the living conditions of the whole Nation in relation to the product it. controls. Price fixing is not a government function. Where natural forces are allowed to operate, price adjusts itself automatically.

If a bread monopoly of such magnitude come into existence, then a monopoly of every necessity of life will surely follow. Where these, again, come under the control of a directorate representing each monopoly, corporate tyranny will be complete.

This congestive process is active, not only in every line of manufacture but also in farm products and raw materials upon and below the earth's surface. It cannot be effectively stopped, because we ignore the issue of land monopoly whereby one citizen has power to charge another for the use of land. It is easy to perceive in this unsymmetrical elemental relation the process by which monopoly and pauperism have for ages thrived and be-

come firmly established institutions. There are three determinations of business today: First, our present fierce competition burdened with rents, royalties, taxes and restrictions unending; secondly, the monopoly corporation, from which, by its very nature, justice is impossible; thirdly, natural competition, with land and raw materials freed from private monopoly and easily attainable, and with but one tax-the rent due to the Government for the exclusive use of the land, for all practical purposes owned by the user. For in equity the Nation owns the land and ground rent is the natural government

Under conditions so full of hope, men with technical ability would organize, and, needing little capital, they would soon be able to benefit by their earnings instead of being controlled from the outside and perpetually submerged in fictitious debt.
